PATENT ASSIGNMENT

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the undersigned:

St. Jude Medical Systems AB ("SJMS AB"), a corporation organized and existing under the laws of Sweden, having its registered office address at Box 6350, 751 35 Uppsala, Sweden, and registered with the Swedish Companies Registration Office under registration number 556335-1231

("ASSIGNOR") owner of rights in the United States of America and its territories and possessions to various U.S. Patents and patent applications, including but not limited to patents and patent applications that relate to products for physiological assessment, such as pressure guide wire products under the mark PressureWire™, and monitors and accessories, including analyzers under the RadiAnalyzer Xpress™ mark and integrated platforms and components under the QUANTIEN™ mark, and products for hemostasis management, such as products under the FemoSeal™, FemoStop™ and RadiStop™ marks, and related accessories, and all technologies enabled by the preceding ("The Technology"), and including, but not limited to the United States patents and patent applications set forth in the attached Schedule A, and potential future owner of legal title to various U.S. Patents and patent applications that have yet to issue and that are to be assigned pursuant to the Research and Development Services Agreement executed by St. Jude Medical Coordination Center BVBA and ASSIGNOR, effective September 23, 2014 ("the R&D Services Agreement"), does hereby assign, grant, and convey to:

St. Jude Medical Coordination Center BVBA ("SJM BVBA"), a private limited liability company organized under the laws of Belgium, having its registered office at The Corporate Village, Da VinciLaan 11-Box F1, B-1930 Zaventem, Belgium and registered with the Crossroads Bank of Enterprises (*Banque-Carrefour des Entreprises*) under number 0888.256.714 ("ASSIGNEE")

all of ASSIGNOR's right, title and interest in and to:

- (i) each and every United States patent and patent application currently owned by ASSIGNOR, including each and every patent and patent application listed in Schedule A;

- (ii) each and every United States patent and patent application that may issue from, be based on, claim priority to, or be entitled to claim priority to, any United States patent or patent application or any PCT application designating the United States, currently owned by ASSIGNOR, whether set forth in the attached Schedule A or otherwise (inclusive of any reissue and/or reexamination applications thereof), including any United States patent application that derives from, or is based in whole or in part on, any such United States patents, patent applications, or PCT applications designating the United States; and
- (iii) each and every United States patent and patent application obtained, to be obtained, filed, or to be filed by ASSIGNOR that (i) claims subject matter created during the term of the R&D Services Agreement; and (ii) relates to The Technology; including, but not limited to, any United States patents and patent applications set forth in the attached Schedule B;

including all reissues and extensions of said patents.

From time to time, whether on its own or at the request of the ASSIGNEE, ASSIGNOR may amend attached Schedule B to list patents and patent applications that have been assigned pursuant to categories (ii) or (iii) above. Any failure by ASSIGNOR to list one or more patents or patent applications in any version of Schedule B, even while listing later-issued patents or later-filed patent applications, will not be construed to imply or suggest that the former patents and patent applications have not been so assigned. All patents identified in categories (ii) and (iii) above are included within the scope of this assignment regardless of whether Schedule B is ever amended to list them expressly.

The undersigned hereby grant its representatives before the U.S. Patent and Trademark Office ("Patent Office") the power to insert in this Assignment any further identification which may be necessary or desirable to comply with the rules of the Patent Office for recordation of this Assignment.

St. Jude Medical Systems AB

U.S. Patent Applications	Inventors

PATENT ASSIGNMENT

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the undersigned:

St. Jude Medical Systems AB ("SJMS AB"), a corporation organized and existing under the laws of Sweden, having its registered office address at Box 6350, 751 35 Uppsala, Sweden, and registered with the Swedish Companies Registration Office under registration number 556335-1231

("ASSIGNOR") owner of rights in the United States of America and its territories and possessions to various U.S. Patents and patent applications, including but not limited to patents and patent applications that relate to products for physiological assessment, such as pressure guide wire products under the mark PressureWire™, and monitors and accessories, including analyzers under the RadiAnalyzer Xpress™ mark and integrated platforms and components under the QUANTIEN™ mark, and products for hemostatis management, such as products under the FemoSeal™, FemoStop™ and RadiStop™ marks, and related accessories, and all technologies enabled by the preceding ("The Technology"), and including, but not limited to the United States patents and patent applications set forth in the attached Schedule A, and potential future owner of legal title to various U.S. Patents and patent applications that have yet to issue and that are to be assigned pursuant to the Research and Development Services Agreement executed by St. Jude Medical Coordination Center BVBA and ASSIGNOR, effective September 23, 2014 ("the R&D Services Agreement"), does hereby assign, grant, and convey to:

St. Jude Medical Coordination Center BVBA ("SJM BVBA"), a private limited liability company organized under the laws of Belgium, having its registered office at The Corporate Village, Da Vincilaan 11-Box F1, B-1930 Zaventem, Belgium and registered with the Crossroads Bank of Enterprises (*Banque-Carrefour des Entreprises*) under number 0888.256.714 ("ASSIGNEE")

all of ASSIGNOR's right, title and interest in and to:

- (i) each and every United States patent and patent application currently owned by ASSIGNOR, including each and every patent and patent application listed in Schedule A;

- (ii) each and every United States patent and patent application that may issue from, be based on, claim priority to, or be entitled to claim priority to, any United States patent or patent application or any PCT application designating the United States, currently owned by ASSIGNOR, whether set forth in the attached Schedule A or otherwise (inclusive of any reissue and/or reexamination applications thereof), including any United States patent application that derives from, or is based in whole or in part on, any such United States patents, patent applications, or PCT applications designating the United States; and
- (iii) each and every United States patent and patent application obtained, to be obtained, filed, or to be filed by ASSIGNOR that (i) claims subject matter created during the term of the R&D Services Agreement; and (ii) relates to The Technology; including, but not limited to, any United States patents and patent applications set forth in the attached Schedule B;

including all reissues and extensions of said patents.

From time to time, whether on its own or at the request of the ASSIGNEE, ASSIGNOR may amend attached Schedule B to list patents and patent applications that have been assigned pursuant to categories (ii) or (iii) above. Any failure by ASSIGNOR to list one or more patents or patent applications in any version of Schedule B, even while listing later-issued patents or later-filed patent applications, will not be construed to imply or suggest that the former patents and patent applications have not been so assigned. All patents identified in categories (ii) and (iii) above are included within the scope of this assignment regardless of whether Schedule B is ever amended to list them expressly.

The undersigned hereby grant its representatives before the U.S. Patent and Trademark Office ("Patent Office") the power to insert in this Assignment any further identification which may be necessary or desirable to comply with the rules of the Patent Office for recordation of this Assignment.
