This Assignment, dated as of August 24, 2011 (the "Effective Date"), is entered into by and between Dr. Davis Hartman, an individual residing at 11451 East Troon Lane, Scottsdale, AZ 85255 (the "Assignor") and Ambature, Inc., a Delaware corporation having a principle place of business at Suite 250, 7047 E. Greenway Parkway, Scottsdale, AZ 85254 (the "Assignee");

WHEREAS Assignee has and plans to continue to disclose certain information to Assignor related to thin films, low resistance materials and high temperature superconductors (the "Ambature Technology");

WHEREAS Assignor may, subsequent to and as a result of such disclosure, create, develop or invent technology related to or based on the Ambature Technology and as a result may have certain rights in technology, intellectual property, and/or other proprietary rights related to the Ambature Technology; and

WHEREAS, Assignee is desirous of acquiring such technology and such rights related to the Ambature Technology from Assignor.

DEFINITIONS:

"Assigned Intellectual Property" means any and all technology related to or based on the Ambature Technology, as well as any and all Intellectual Property or other proprietary rights related thereto, that are created, conceived, invented, or otherwise come into being within five (5) years after the most recent disclosure by Assignee to Assignor of information pertaining to the Ambature Technology;

"Intellectual Property" means all intellectual and industrial property, including without limitation: (a) inventions, whether or not patentable, whether or not reduced to practice or whether or not yet made the subject of a pending Patent application or applications, (b) ideas and conceptions of potentially patentable subject matter, including, without limitation, any patent disclosures, whether or not reduced to practice and whether or not yet made the subject of a pending Patent application or applications, (c) Patents, (d) trade secrets and confidential, technical or business information (including ideas, formulas, compositions, designs, inventions, and conceptions of inventions whether patentable or unpatentable and whether or not reduced to practice), (e) whether or not confidential, technology (including know-how and show-how), manufacturing and production processes and techniques, methodologies, research and development information, drawings, specifications, designs, plans, proposals, technical data, copyrightable works, financial, marketing and business data, pricing and cost information, business and marketing plans and customer and supplier lists and information, (f) copies and tangible embodiments of all the foregoing, in whatever form or medium, (g) all rights to obtain and rights to apply for Patents, (h) all rights under any license agreements and any licenses, registered user agreements, technology or materials, transfer agreements, and other agreements or instruments with respect to items in (a) to (h) above; and (i) all rights to sue and recover and retain damages and costs and attorneys' fees for present and past infringement of any of such rights in such intellectual and industrial property; and

"Patents" means all national (including the United States) and multinational statutory invention registrations, patents, patent registrations, patent applications, provisional patent applications, industrial designs, industrial models, including all reissues, divisions, continuations, continuations-in-part, extensions and reexaminations, and all rights therein provided by multinational treaties or conventions and all improvements to the inventions disclosed in each such registration, patent or application.

NOW, THEREFORE, in consideration of One Dollar (\$1.00) and other good and sufficient consideration, the receipt of which is hereby acknowledged, the Assignor hereby does assign, unto the Assignee, its successors, legal representatives, and assigns, the entire right, title, and interest in and to the Assigned Intellectual Property, including the right to sue for prior infringements, misappropriations or other unauthorized use and the right to recover and retain damages, including provisional or other royalties, the same to be held and enjoyed by the Assignee, for its own use and behalf and the use and behalf of its successors, legal representatives, and assigns, as fully and entirely as the same would have been held and enjoyed by the Assignor had this assignment not been made;

Assignor hereby covenants and warrants to the Assignee, its successors, legal representatives, and assigns, that, at the time of execution and delivery of this Assignment, the Assignor is the sole and lawful owner of the entire right, title, and interest in and to the Assigned Intellectual Property free and clear of any liens or encumbrances or other obligations, and that the Assignor has good and full right and lawful authority to sell and convey the same in the manner herein set forth; and

Assignor further covenants and agrees to assist Assignee, its successors, legal representatives, and assigns to sign all papers and documents, take all lawful oaths, and do all acts necessary or required to be done to perfect and record the assignment contemplated herein and to assist Assignee with the procurement, maintenance, enforcement and defense of the Assigned Intellectual Property without charge to the Assignee, its successors, legal representatives, and assigns, but at the cost and expense of the Assignee, its successors, legal representatives, and assigns.
