PATENT ASSIGNMENT

This assignment is made by inventor Cheryl Eckert, a United States citizen and resident of Sherman Oaks, California (“Assignor”), to Leave It Leash, LLC, a California limited liability company with offices in Los Angeles, California (“Assignee”);

WHEREAS, Assignor has invented a new, original and useful invention entitled a Leash Device (“the Invention”), for which Assignor has acquired U.S. patent protection as identified in the attached Appendix A (“the Eckert Patents”);

WHEREAS, Assignor believes herself to be the original, first, and sole inventor of the Invention disclosed and claimed in the Eckert Patents; and

WHEREAS, Assignee desires to acquire by formal, recordable assignment its entire right, title, and interest in and to the Invention, the Eckert Patents, and any provisional, non-provisional, divisional, continuation, continuation-in-part, reissue, foreign, or other application based on the Invention, in the United States and throughout the world.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor hereby sells, assigns, and transfers to Assignee, her entire right, title, and interest in and to the Invention and the Eckert Patents for the Invention in the United States and throughout the world, including the exclusive right to file any provisional, non-provisional, divisional, continuation, continuation-in-part, reissue, foreign, or other application based on the Invention directly in the name of Assignee and to claim any priority rights to which such applications are entitled under international conventions, treaties, or otherwise.

Further, Assignor agrees that, upon request and without further compensation, but at no expense to Assignor, she and her legal representatives and assigns will do all lawful acts, including the execution of papers and the giving of testimony, that may be necessary or desirable for obtaining, sustaining, reissuing, or enforcing the Eckert Patents in the United States and throughout the world for the Invention, and for perfecting, recording, or maintaining the title of Assignee, its successors and assigns, to the Invention, and the Eckert Patents identified herein, and any patents granted for the Invention in the United States and throughout the world.

Assignor represents and warrants that she has not granted and will not grant to others any rights inconsistent with the rights granted herein.

Assignor authorizes and requests the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any Patent granted for the Invention, whether on the Eckert Patents, or on any subsequently filed provisional, non-provisional, divisional, continuation, continuation-in-part, reissue, or other application, to Assignee, its successors and assigns, as the assignee of Assignor's entire interest in the Invention.
