Patent Application Title: HUMAN MACHINE INTERFACE FOR A CONTROLLER

Patent Application No.: 29/717,274

Filing Date: December 16, 2019

Pursuant to an agreement between each inventor and Assignee or other legal obligation supported by good and valuable consideration, the receipt of which is acknowledged by each inventor, each undersigned named inventor to the above patent application declares and agrees to the following by signing below:

1. ASSIGNMENT. I confirm any prior assignments (whether written, by operation of law, or otherwise) of my title, right and interest (individually and collectively "interests") in the above patent application and inventions therein (the "Patent Rights") to Deere & Company ("Deere" or "Assignee"), and hereby assign all my remaining interests in the Patent Rights to Deere (including all enforcement rights and remedies for past and future infringements and all rights of priority to apply for and receive patents and registrations worldwide in the name of Deere). I attest that I have not assigned any interests in the Patent Rights to any other party. Upon Deere's written request or upon the written request of any assignee of Deere, I agree to execute promptly any further documents reasonably required to vest, record, or confirm ownership in the Patent Rights in Deere, or any Deere-designated assignee, on a worldwide basis and to cooperate fully with Deere, or any Deere-designated assignee, in any legal proceeding to enforce its legal rights in or to the Patent Rights throughout the world. Further, I shall cooperate with Deere, or any Deere-designated assignee, to the fullest extent possible, in any efforts to obtain issuance, or maintenance, of any patents throughout the world arising from the Patent Rights, as well as in enforcing or securing resolution of any conflict or dispute, concerning rights in the Patent Rights.
2. GENERAL. I acknowledge that (1) this document supplements, and does not supersede, any agreements I may have with Deere or its subsidiaries relating to the Patent Rights, application and inventions therein, (2) I reviewed and understand the contents of the application, including the claims, and (3) I am aware of the duty (as defined in 37 CFR § 1.56) to disclose all information I know to be material to patentability for any U.S. non-provisional application that claims priority based on the above provisional patent application.
