**WHEREAS**, Assignor is the owner of the patents and provisional and non-provisional patent applications set forth in Schedule A attached hereto (collectively, the "**Patents**"); and

**WHEREAS**, Assignor desires to assign to Assignee, and Assignee accepts, the Assignor's entire right, title and interest, in the United States of America and in all other countries, to the Patents.

**NOW, THEREFORE**, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor and Assignee agree as follows.

**Assignment.** Assignor does hereby assign, transfer, and convey to Assignee, its successors, assigns and other legal representatives, and Assignee does hereby accept, the Assignor's entire worldwide right, title, and interest (including, without limitation, all rights therein provided by international conventions and treaties) that may exist today and in the future in and to the following (collectively, the "**Assigned Patent Rights**"):

3. continuations, continuations-in-part, divisionals, and continuing prosecution applications of any of the items listed in (1) or (2) of this Assignment;
4. reissues, reexaminations, renewals and extensions of any of the items listed in (1), (2) or (3) of this Assignment;
5. counterparts, in any non-U.S. jurisdiction or on file with any multi-national registration body, to any of the items listed in (1) through (4) of this Assignment, including without limitation, utility models, inventors' certificates, industrial design protection and any other form of governmental grants or issuances for the protection of inventions, designs or discoveries;

7. patents that issue anywhere in the world from any of the items listed in (1) through (6) of this Assignment;
8. claims, causes of action at law and equity, and enforcement rights of any kind, whether currently pending, filed or otherwise, and whether known or unknown, under or arising from any of the items listed in (1) through (7) of this Assignment, including all rights to
