In consideration of good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the undersigned **Kuros Biosciences AG** (the Assignor) hereby sells and assigns to **Kuros US LLC** (the Assignee), a corporation having a principle place of business at 1209 Orange Street, Corporation Trust Center, Wilmington, DE 19801, United States, their entire right, title and interest, including the right to sue for past infringement and to collect for all past, present and future damages, for the United States of America (as defined in 35 U.S.C. § 100) and throughout the world,

(a) in the invention(s) known as **PACKAGING OF IMMUNOSTIMULATORY CPG INTO VIRUS-LIKE PARTICLES: METHOD OF PREPARATION AND USE** for which application for patent in the United States of America was filed on **November 10, 2011**, also known as United States Application No. **13/294,006**, now **United States Patent No. 8,691,209**, issued **April 8, 2014** in any and all applications thereon, in any and all Letters Patent(s) therefor, and

(b) in any and all applications that claim the benefit of the patent applications listed above in part (a), including non-provisional applications, international applications, continuing (continuation, divisional, or continuation-in-part) applications, reissues, extensions, renewals and reexaminations of the patent application or Letters Patent therefor listed above in part (a), to the full extent of the term or terms for which Letters Patents issue, and

(c) in any and all inventions and discoveries described in the patent applications listed above in part (a), and in any and all forms of intellectual and industrial property protection derivable from such patent application, and that are derivable from any and all continuing applications, reissues, extensions, renewals and reexaminations of such patent application, including, without limitation, patents, applications, utility models, inventor's certificates, and designs together with the right to file applications therefor; and including the right to claim the same priority rights from any previously filed applications under the International Agreement for the Protection of Industrial Property, or any other international agreement, or the domestic laws of the country in which any such application is filed, as may be applicable;

all such rights, title and interest to be held and enjoyed by the above-named Assignee, its successors, legal representatives and assigns to the same extent as all such rights, title and interest would have been held and enjoyed by the Assignor had this assignment and sale not been made.

The undersigned agrees to execute all papers necessary in connection with the applications and any non-provisional, international, continuing (continuation, divisional, or continuation-in-part), reissue, reexamination or corresponding application(s) thereof and also to execute separate assignments in connection with such application(s) as the Assignee may deem necessary or expedient.

The undersigned agrees to execute all papers necessary in connection with any derivation or patent enforcement action (judicial or otherwise) related to the applications or any non-provisional, continuing (continuation, divisional, or continuation-in-part), reissue or reexamination application(s) thereof and to cooperate with the Assignee in every way possible in obtaining evidence and going forward with such interference or patent enforcement action.
