WHEREAS, the undersigned inventors (the "Inventors") have made certain inventions, improvements, and discoveries (the "Invention" or the "Inventions") disclosed and/or claimed in the patent application (the "Application") filed in the United States Patent and Trademark Office ("USPTO") on 2019-07-18 and given Application No. 16/516,077, and which claims the benefit or priority of Application No. US 62/862,005 filed on 2019-06-14;

WHEREAS, the Assignee desires to acquire, and each undersigned inventor desires to grant to the Assignee, the entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications and patents directed thereto;

NOW, THEREFORE, the parties agree as follows:

1. For good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, each undersigned Inventor ("Assignor") hereby conveys, transfers and assigns to the Assignee, its lawful successors and assigns, and the Assignee accepts, the entire worldwide right, title, and interest in and to the Invention(s), the above-identified patent application, and any and all other patent applications and patents for the Invention(s) which may be applied for or granted in the United States and in all foreign countries and jurisdictions, including all provisional, non-provisional, divisional, continuation, continuation-in-part (CIP), reissue, reexamination, renewal, extension, counterpart, substitute, application(s) and extensions thereof, including the right to file foreign applications under the provisions of any treaty or convention, including all grants, such as Letters Patent, certificates, utility models, confirmations, extensions, reissues and reexamination certificates, and including all rights or priority resulting from the filing of such applications and grants resulting therefrom.

4. The Inventors shall take such steps and actions, and provide such cooperation and assistance to the Assignee and its successors, assigns, and legal representatives, in connection with the Inventions and the Applications, or for any inventions and discoveries derived therefrom, as may be necessary to effect, evidence, or perfect the Assignment to the Assignee or any assignee or successor thereto, including, but not limited to: the execution and delivery of any affidavits, declarations, oaths, exhibits, assignments, powers of attorney, documents in connection with claims or provisions of the International Convention for the Protection of Industrial Property or similar treaties and agreements, or other lawful papers; the execution and delivery of all papers necessary in connection with any administrative or judicial proceedings.
