AND, WHEREAS, ARGO AI, LLC, a Delaware corporation having a place of business at 2545 Railroad Street, Pittsburgh, Pennsylvania 15222 (hereinafter referred to as the "ASSIGNEE"), desires to acquire the entire right, title, and interest in and to all aspects of the subject matter, inventions, and improvement described in any and all applications directed to the INVENTION, without limitation to any claimed embodiments;

NOW, THEREFORE, for good and valuable consideration conferred to the undersigned Inventor(s), the receipt of which is hereby acknowledged, each Inventor (hereinafter referred to as the "ASSIGNOR(S)") does hereby sell, assign and transfer unto ASSIGNEE its successors and assigns, the entire right, title and interest,

(a) in and to any and all applications for patent directed to the INVENTION in the United States of America having a filing date or a 371(c) date of October 28, 2021, and in any patents and patent applications to which any such application or applications claim priority, and in any and all Letters Patent(s) issued therefor, including but not limited to those Letters Patent or patent applications having the following serial numbers or publication number(s):

(b) in and to any and all applications that claim the benefit of the patent application listed above in part (a), including non-provisional applications, continuation, divisional, or continuation-in-part applications, reissues, extensions, renewals and reexaminations of the patent application or Letters Patent listed above in part (a), and in any and all Letters Patent(s) issued therefor, to the full extent of the term or terms for which Letters Patents issue, and

(c) in and to all aspects of the subject matter, inventions, and improvements pertaining to the INVENTION, including all inventions described in the patent application listed above in part (a), and in any and all forms of intellectual and industrial property protection derivable from such patent application throughout the world, and that are derivable from any and all continuing applications, divisional applications, continuation-in-part applications, reissues, extensions, renewals and reexaminations of such patent application, including, without limitation, patents, applications, utility models, inventor's certificates, and designs together with the right to file applications therefor; and including the right to claim the same priority rights from any previously filed applications under the International Agreement for the Protection of Industrial Property, or any other international agreement, or the domestic laws of the country in which any such application is filed, as may be applicable, and

(d) the right to sue and recover any and all damages and profits, and any and all remedies stemming from past, present, or future infringements of patents directed to the INVENTION in the United States of America (as defined in 35 U.S.C. § 100) and throughout the world;

all such rights, title and interest to be held and enjoyed by the ASSIGNEE, its successors, legal representatives and assigns to the same extent as all such rights, title and interest would have been held and enjoyed by the undersigned ASSIGNOR(S) had this assignment and sale not been made.

The undersigned ASSIGNOR(S) warrant and agree that:

(a) no assignment, sale, agreement, or encumbrance has been or will be made or entered into which would conflict with this assignment, and to the extent any purported assignment was previously made by ASSIGNOR(S) to a subsidiary of the ASSIGNEE for future inventions, such purported assignment is affirmed as hereby vesting with the ASSIGNEE for the present INVENTION,

(b) upon request, ASSIGNOR(S) will promptly provide ASSIGNEE with all pertinent facts and documents relating to the INVENTION as may be known and accessible to ASSIGNOR(S),

(c) ASSIGNOR(S) will, at ASSIGNEE'S expense, testify as to the same in any interference, litigation or proceeding related to the INVENTION, and
