Assignor is an inventor of inventions ("Inventions") in the above listed US patent applications (the "Applications"). The Applications have US Patent and Trademark Office filing dates and application numbers as indicated above. Notwithstanding, if no application number, attorney docket number, or title is shown for an existing Application for which a prior assignment agreement has been made or is to be made between the Assignor and Assignee, then this Agreement shall supersede it in the manner noted above.

For valuable consideration, receipt of which is acknowledged, the Assignor hereby reaffirms his assignment to Assignee (which term shall include Assignee's successors and assigns), all of Assignor's right, title and interest in the Inventions, all improvements therein, the Applications and all priority rights arising therefrom, and any patents, and any reissues and extensions thereof, which issue in any country upon any patent applications which correspond with any of the following: the Applications, any divisional, continuation-in-whole, or substitute United States application which is based on any of the Applications; or any continuation-in-part United States application (including divisions, continuations-in-whole or -in-part, and substitutions thereof or

therefor) based in-part on any of the above described Applications; and Assignee accepts that assignment. To avoid any ambiguity, with this Assignment and the prior assignments, the Assignor expressly transfers all past, present, and future damages relating to the Applications, whether or not issued, to the Assignee.

Assignor further agrees that such Assignor will, without further consideration, cooperate with Assignee in the prosecution of all of the above applications, execute, verify, acknowledge and deliver all such further papers, including applications for patents and for reissues, extensions, and instruments of assignment and transfer thereof, and will communicate any facts known to Assignor relating to the Invention, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee.

Assignor further agrees that such Assignor shall:

- 1) without further compensation to Assignor during the term of such Assignor's employment by Assignee, and
- 2) after Assignor's employment by Assignee, while such patents are maintained in force by the Assignee, for reasonable compensation as mutually agreed to between Assignor and Assignee,

perform such other acts as may be reasonably required when requested by Assignee, including attending depositions, preparing and executing declarations and affidavits and testifying as a witness, to obtain or maintain or enforce patents for the Invention and improvements therein in any and all countries and to vest title thereto in Assignee.

Assignor hereby authorizes and requests Nutter McClennen & Fish, LLP to supply any missing patent/application identification information or correct any errors in the patent/application identification information provided above, whether discovered prior to or after recordation.

By executing this Assignment, Assignee accepts the assignment and reaffirmation thereof set forth above.

Assignor and Assignee agree that this instrument may be executed in any number of counterparts, each of which shall be deemed to be an original and all of which together shall constitute one and the same agreement; and that an original signature or a copy thereof transmitted by facsimile or by PDF shall constitute an original signature for purposes of this instrument.
