WHEREAS, the Assignor(s) identified above (hereinafter, individually and collectively the "Assignor"), has invented and created certain new, original, ornamental/industrial design(s) for an article of manufacture (the "Design"), disclosed and described in an application for a design patent in the United States ("U.S.") filed on the filing date indicated above in the United States Patent and Trademark Office ("USPTO") and identified by the title, application number, and/or attorney docket number indicated above (the "Design Application"); and

WHEREAS, Assignee, a corporation organized and existing under the laws of the State indicated above, and having its principal place of business at the address indicated above, desires to acquire the entire right, title, and interest of Assignor in and to the Design, the Design Application and in, to, and under any and all design patents and industrial design registrations to be obtained therefor;

Assignor further authorizes said Assignee, its successors, and assigns, or anyone it may properly designate, to apply for a design patent in the U.S. and corresponding design registrations in any and all foreign countries and regions, in its own name if desired, and otherwise take advantage of the provisions of any international conventions; and

Assignor represents and warrants that Assignor has the right, title, and authority to execute this Assignment and to convey all right, title, and interest in the Design Rights, and that Assignor has not conveyed nor will convey hereafter all or part of the Design Rights to a third party, and Assignor hereby covenants and agrees with the Assignee, its successors and assigns, that Assignor will not execute in writing or do any act whatsoever conflicting with these representations; and

Assignor, Assignor's successors, legal representatives, or administrators will at any time upon request, without further or additional consideration, its successors, and assigns, execute such additional writings and do such additional acts as said Assignee, its successors, and assigns, may deem necessary or desirable to perfect the Assignee's enjoyment of this grant, and render all necessary assistance in making application for, obtaining, and enforcing any of the Design Rights, including giving testimony in any proceedings or transactions involving such Design Rights; and
