## ASSIGNMENT

Whereas, CounterPath Corporation, a corporation of Nevada having a place of business at 300-305 Burrard Street Vancouver, BC V7X 1M3 Canada (hereinafter referred to as "CounterPath"), owns all right, title and interest in and to the patents and/or patent applications identified in Exhibit A attached hereto, including the inventions described therein and the patents issued and reissued thereon (collectively, the "Patents"), the renewals thereof and all claims for past or future infringement thereof.

Whereas, under this Patent Assignment (hereinafter referred to as "the Assignment") Alianza Inc., a corporation of Delaware having a place of business at 1064 S. North County Boulevard, Suite 500, Pleasant Grove, Utah 84062 (hereinafter referred to as "Alianza"), desires to acquire from CounterPath, and CounterPath desires to assign to Alianza, all right, title and interest in and to the Patents, and the renewals thereof and all claims for past or future infringement thereof.

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, CounterPath hereby sells, assigns, conveys and otherwise transfers to Alianza, its successors, legal representatives, and assigns, free and clear of any and all liens, restrictions, claims and encumbrances, CounterPath's entire right, title and interest in and to the Patents, and any and all current or future patent applications thereof which may be applied for or granted therefore in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, continuations-in-part, reissues, reexaminations, renewals, extensions, counterparts, substitutes, nationalizations, and extensions thereof, and all rights of priority resulting from the filing of such applications and granting of such patents, including any patent or patent applications owned by, licensable by, or assignable by CounterPath, which are not listed in Exhibit A. In addition, CounterPath hereby sells, assigns, conveys and transfers unto Alianza, its successors and assigns, free and clear of any and all liens, restrictions, claims and encumbrances, all rights of registration, maintenance, and protection of the Patents in any form, all rights to income, royalties, damages and payments now due or hereafter due or payable in respect thereto, and all rights of recovery and of legal action for past or future infringements and of interference proceedings and reexaminations involving such Patents.

CounterPath acknowledges its obligation to sell, assign, and transfer the rights under the Assignment to Alianza and is unaware of any reason why it may not have the full and unencumbered right to sell, assign, and transfer the rights hereby sold, assigned, and transferred, and has not executed, and will not execute, any document or instrument in conflict herewith.

The Assignment is governed by the substantive laws of the State of Utah and any disputes will be resolved in a Utah state court or federal court sited in Utah.

IN WITNESS WHEREOF, CounterPath and Alianza have caused their duly authorized officers to execute the Assignment as of the date written below.
