WHEREAS, Cirrus Logic, Inc. (hereafter "Cirrus"), a Delaware corporation having its principal place of business at 800 West Sixth Street, Austin, Texas 78701, United States of America, and Cirrus Logic International Semiconductor Ltd. For good and valuable consideration, the receipt and sufficiency of which is acknowledged, and to the extent that Cirrus holds any right, title, and interest in and to any invention, improvements, discoveries, and other intellectual property rights reflected in any pending, non-granted patent application—whether in the United States of America, the United Kingdom, or elsewhere worldwide—having an earliest priority date of 30 March 2015 or later (hereafter "Pending Application Invention"), Cirrus hereby automatically sells, transfers, conveys, and assigns unto CLIS the entire right, title, and interest in and to such Pending Application Invention and in and to any such related pending, non-granted patent application—whether in the United States of America, the United Kingdom, or elsewhere worldwide—and Cirrus further authorizes and assigns all rights to CLIS to apply for any patents, utility models, supplementary protection certificates, patent certificates, and all similar protections related to the Pending Application Invention directly in its own name and to claim priority of the filing date of an application for the earliest patent application(s) filed for the Pending Application Invention under the provisions of any and all laws, international conventions, treaties, or otherwise.

USA Assignment from CLIS to Cirrus, Conditional upon USA Grant:

For good and valuable consideration, the receipt and sufficiency of which is acknowledged, and effective upon issuance of any patent in the United States of America from any United States of America patent application owned by CLIS that has an earliest priority date of 30 March 2015 or later (hereinafter such issued patent referred to as the "USA Issued Patent"), CLIS hereby automatically sells, transfers, conveys, and assigns to Cirrus the entire right, title, and interest to the USA Issued Patent, including but not limited to: (a) all past, present, and future income, royalties, damages and payments due (including rights to damages and payments for past, present, or future infringements or misappropriations) associated with the USA Issued Patent and (b) all rights to initiate and pursue legal and equitable remedies in any cause of action, administrative proceeding, or other procedure associated with the USA Issued

Patent, including but not limited to any right to sue for infringement occurring before or after the assignment herein and any provisional right described in 35 U.S.C. §154(d) and any successor statute thereto.
