## **PATENT ASSIGNMENT**

This PATENT ASSIGNMENT (this "Assignment") is made and entered into as of December 17, 2021 (the "Effective Date"), by and between MetalX, LLC, an Indiana limited liability company ("Assignor"), and BlueScope Recycling and Materials LLC, a Delaware limited liability company ("Assignee"). Assignor and Assignee are sometimes referred to in this Assignment individually as a "Party" and collectively as the "Parties".

WHEREAS, Assignor is the sole owner of record of the entire right, title and interest in and to each of the patents and patent applications listed on Schedule 1 attached hereto (the "Listed Patents").

WHEREAS, Assignee is acquiring Assignor's entire present and future right, title, and interest in, to, and under the Listed Patents, which includes any applications claiming priority from or to the applications listed in Schedule 1, including any divisional, continuing, continuation-in-part, substitute, renewal, improvement, extension, reissue, reexamination and other patent applications thereof.

NOW THEREFORE, for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor does hereby sell, assign, convey, transfer and deliver unto Assignee, Assignor's entire right, title and interest in, to and under the Listed Patents, and any and all (i) patent applications filed either from the Listed Patents or from a patent application claiming priority from or to any of such foregoing patent applications, including divisionals, continuations, continuations-in-part, provisionals, converted provisionals and continued prosecution applications, (ii) patents that have issued or in the future issue from the foregoing patent applications, including utility models, petty patents and design patents and certificates of invention, (iii) extensions or restorations by existing or future extension or restoration mechanisms, including revalidations, reissues, re-examinations and extensions (including any patent term extension, supplementary protection certificates and the like) of the foregoing patents or patent applications ((i) and (ii)), and (iv) foreign counterparts thereof ((i), (ii), and (iii)) (the "Assigned Interests").

Assignor hereby authorizes and requests the United States Commissioner of Patents and Trademarks and the patent office of any applicable country to issue any and all patents granted on any of the Assigned Interests to Assignee as assignee of Assignor's entire right, title and interest, and hereby warrants and covenants that Assignor has the full right to convey Assignor's entire right, title and interest herein assigned, and that Assignor has not executed, and will not execute, any agreements in conflict therewith.

Assignor covenants that, when requested by Assignee and at the sole expense of Assignee, to carry out in good faith the intent and purpose of this Assignment, Assignor will (a) execute all divisional, continuing, continuation-in-part, substitute, renewal, reissue, and all other patent applications on any and all of the Assigned Interests, (b) execute all rightful oaths, declarations, assignments, powers of attorney and other papers related to the Assigned Interests, and (c) communicate to Assignee all facts known to Assignor relating to the Assigned Interests and the history thereof.

The Parties hereby agree that this Assignment is binding on the heirs, assigns, representatives and successors of Assignor and extend to the successors, assigns and nominees of Assignee.

IN WITNESS WHEREOF, each Party has caused this Assignment to be executed on its behalf by its duly authorized representative.
