ASSIGNMENT

WHEREAS, We, **Neil J. Campbell**, and **Michelle Campbell**, hereinafter generally referred to individually as “**ASSIGNOR**” or collectively as “**ASSIGNORS**,” have invented certain new and useful inventions entitled:

“Air Filtration Module”

that are claimed and/or described in U.S. Patent Application No. **29/737,150** filed June 5, 2020; (“**Inventions**”).

WHEREAS, **Celios Corporation**, a corporation having a place of business at 401 Edgewater Place, Suite 190, Wakefield, MA 01880 hereinafter generally referred to as “**ASSIGNEE**,” is desirous of memorializing and confirming, or if necessary acquiring, legal and equitable title in the Inventions.

WHEREAS, **ASSIGNOR** invented the Inventions while performing work for **ASSIGNEE** and believes that they previously assigned all of their rights in the Inventions to **ASSIGNEE**.

NOW, THEREFORE, each **ASSIGNOR** confirms that **ASSIGNOR** intended to assign and assigned all of **ASSIGNOR**’s right, title, and interest in and to the Inventions.

To the extent **ASSIGNORS** retained any right, title, or interest in or to the Inventions, in consideration of good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged and intending to be legally bound hereby, we, **ASSIGNORS**, have assigned and/or hereby sell, assign, transfer and convey unto **ASSIGNEE**, the whole and entire right, title and interest in and to:

all Inventions;

the above patent application and any and all United States and foreign patent applications disclosing one or more of the Inventions including, without limitation, applications for patents including provisionals, non-provisionals, divisions, continuations, continuations-in-part, utility models, PCT applications and designs and any other related United States and foreign applications and equivalents thereof (“**Applications**”), along with the right to claim priority to the Applications under any treaty relating thereto;

all United States and foreign patents, utility models, inventor’s certificates and designs and all equivalents thereof which may be granted for the Inventions or Applications, and all post-grant actions including extensions, renewals, reissues, reexamination certificates, post-grant review certificates, inter partes review certificates, and supplemental examination certificates thereof (“**Patents**”); and

all rights to sue for and recover for, and the right to profits and damages due or accrued arising out of or in connection with any and all past, present or future infringements in the United States and all foreign countries, of the Inventions, Applications or Patents for the sole use and benefit of **ASSIGNEE**, its successors, assigns and legal representatives.

The Inventions, Applications and Patents to be held and enjoyed by ASSIGNEE, for ASSIGNEE's own use and benefit, and for ASSIGNEE's legal representatives and assigns to the full end of the term or terms of said granted or to be granted Patents, as fully and entirely as the same would have been held by ASSIGNORS had this assignment not been made; and for the aforesaid consideration ASSIGNORS hereby covenant, agree and undertake to execute, whenever requested by the above-named ASSIGNEE, all patent applications, assignments, declarations, lawful oaths and any other papers which ASSIGNEE may deem necessary or desirable for securing to ASSIGNEE or for maintaining for ASSIGNEE all the Applications and Patents hereby assigned or agreed to be assigned; all without further compensation to the undersigned ASSIGNORS.

It is agreed that ASSIGNORS shall be legally bound, upon request and at the expense of ASSIGNEE or its successors or assigns or a legal representative thereof, to supply all information and evidence of which the undersigned has knowledge or possession, relating to the making and practicing of the Inventions, and to testify in any legal proceeding relating thereto.

Each ASSIGNOR hereby represents and warrants that they have full right, power and authority to assign their entire right, title, and interest in the Inventions, Applications, and Patents, and no assignment, sale, agreement, or encumbrance has been or will be made or entered into which would conflict with this Assignment.

This Assignment has been duly executed and delivered and constitutes a valid, binding and enforceable assignment of the entire right, title, and interest in the Inventions, Applications, and Patents.
