**WHEREAS**, Licensor and Licensee entered into an Asset Purchase Assignment whereby Licensor sold and transferred the assets including the Patents and good will thereof to Licensee, effective January 11, 2018; and

**NOW THEREFORE**, incorporating the recitals as set forth above, for good and valuable consideration, the receipt of which is hereby acknowledged, Assignor assigns the Patents to Assignee as follows:

### **1. GRANT OF RIGHTS**

- a. Assignor hereby assigns to Assignee and its successors, representatives and assigns, all of Assignor's right, title and interest in and to the Patents and said improvements, and all divisions and continuations in whole or part or substitute applications filed claiming the benefit of the Patents or said improvements, and all United States Letters Patents which may be granted thereon, and all reissues, reexaminations, and extensions thereof, and all priority rights under all available International Agreements, Treaties and Conventions for the protection of intellectual property in its various forms in every participating country, and all applications for patents (including related rights such as utility-model registrations, inventor's certificates, and the like) heretofore or hereafter filed for said improvements in any foreign countries, and all patents (including all continuations, divisions, extensions, renewals, substitutes, and reissues thereof) granted for said improvements in any foreign countries
- b. Assignor hereby authorizes and requests the United States Commissioner of Patents and Trademarks, and any officials of foreign countries whose duty it is to issue patents and applications as aforesaid, to issue all patents for said improvements to Assignee in accordance with the terms of this Assignment;
- c. Assignor hereby further assigns to Assignee all of its right to (i) all damages and other proceeds hereafter recovered or received in any infringement suit, settlement or other proceeding related to the Patents, (ii) the right to sue for past, present, and future infringement of the Patents, and (iii) all other rights corresponding to the Patents, including but not limited to, all license agreements covering said patents and any existing or future applications and registrations related to the Patents throughout the world.

## 2. RIGHTS AND OBLIGATIONS

- a. Assignor agrees to execute and deliver, or cause to be executed and delivered, to Assignee or any purchaser of the Patents from Assignee, any and all documents and instruments, in form and substance reasonably satisfactory to Assignee and its counsel, necessary or useful or which may become necessary or useful to effect and complete the transfer, grant or sale to Assignee of all rights or property acquired or intended to be acquired by Assignee under this Assignment and shall pay any fees or expense necessary for such transfer, grant or sale, found due and owing prior to the date of this Assignment;
- b.
