## ASSIGNMENT OF PATENTS AND PATENT APPLICATIONS

WHEREAS, American Products, LLC (hereinafter referred to as "Assignor"), is the owner of the patents and patent applications identified in Schedule A;

WHEREAS, KM2022 LLC, a Missouri limited liability company (hereinafter referred to as the "Assignee"), is desirous of acquiring all of Assignor's rights, title and interest in and to said patents and patent applications within the United States and its territorial possessions and all foreign countries and any United States or foreign patents that may be granted therefor; and

WHEREAS, in accordance with the terms of the Asset Purchase Agreement by and among Assignor, Assignee, Koch Enterprises, Inc., Ensign Solutions, LLC, and AmProd Holdings, LLC dated December 31, 2021, Assignee desires to obtain an assignment of Assignor's rights in the patents and patent applications identified in Schedule A, and Assignor desire to assign their rights in patents and patent applications identified in Schedule A to Assignee;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and with the intention of being legally bound hereby, Assignor do hereby sell, assign, transfer and set over unto Assignee all of Assignor's rights, title and interest in and to the patents and patent applications identified in Schedule A within the United States of America and its territorial possessions and all foreign countries, and in and to any patents of the United States and all foreign countries that may be granted therefore, including all divisions, continuations, continuations-in-part, substitutes, patents of addition, reissues, reexaminations, renewals, and extensions thereof, and the right to apply for patents in foreign countries with full benefit of such priorities as may now or hereafter be granted to the Assignor by local laws or by treaty, including any international convention for the protection of industrial property, together with the right to extend the protection of said United States patents to the various territorial possessions now owned or which may be hereafter acquired by the United States of America, all said rights to be held and enjoyed by the Assignee for its use and benefit and for the use and benefit of its successors or assigns, to the full end of the term for which said patents are or may be granted, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment and sale had not been made. Assignor hereby request and authorize the United States Commissioner of Patents and Trademarks, and any officials of foreign countries whose duty it is to issue patents on applications as aforesaid, to issue all said patents, when granted, in accordance with the terms of this Assignment.

Assignor further sell, assign and transfer to Assignee, its successors and assigns, all of Assignor's rights to sue for and to recover and retain all damages and profits arising from past infringements or unauthorized use of any such patent, or unpaid royalties with respect to use of any such patent, occurring before the date of this Assignment.

Assignor further agree that, when requested, Assignor will, without demanding any further consideration therefore but at the expense of the Assignee, do all lawful and just acts, including the execution and acknowledgement of instruments, that may be or become necessary for obtaining, sustaining, reexamining or reissuing United States or foreign patents for the inventions and patent applications, and for maintaining and perfecting the Assignee's right to the patents and patent applications particularly in cases of interference and litigation. In this regard, Assignor hereby appoints Assignee as its attorney in fact to execute and deliver any and all such documents or instruments as Assignee may deem necessary or appropriate to vest in Assignee sole and exclusive right, title, and interest in and to the patents and patent applications identified in Schedule A and all other rights assigned hereunder. Such appointment shall be deemed to be a power coupled with an interest and is, therefore, irrevocable.

We have hereto set our hands as of this 31<sup>st</sup> day of December, 2021.
