PATENT

REEL: 058800 FRAME: 0548

ASSIGNMENT AGREEMENT

Charles E Ankner ("the Inventor"), has filed U.S. Patent Application Serial No. **62/727,820** and an International Patent Application No. **PCT/US19/49829**, both with a patent application title of VAPORIZER APPARATUSES AND VAPORIZING METHODS (collectively, "the Invention"); and

Bergstrom Innovations, LLC ("the Assignee") seeks to acquire an interest in the Invention and in all foreign and domestic patents and patent applications, including divisions, continuations, continuations-in-part, reissues, substitutions, and extensions thereof, directed to the Invention ("the Intellectual Property");

For good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Inventor sells, assigns, and transfers to the Assignee, its successors and assigns, the full and exclusive right to the Intellectual Property, including any and all priority rights (e.g., the right to claim priority from U.S. Patent Application Serial No. 62/727,820 and/or International Patent Application No. PCT/US19/49829).

The Inventor authorizes and requests the Patent Office officials in the United States and any and all foreign countries to issue any and all patents directed the Invention, when granted, to the Assignee for the sole use of the Assignee and its successors and assigns.

Further, except for the potential rights of co-inventors to the Invention, the Inventor declares that he is the sole and lawful owner of the entire right, title, and interest in and to the rights assigned in connection with the Invention and with the above-identified patent applications, and that the same are unencumbered. The Inventor declares that he has full right and lawful authority to sell and convey the same in the manner herein set forth.

Further still, the Inventor agrees that he will communicate to the Assignee, or its representatives, any facts known respecting the Invention, and to testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, continuation-in-part, reissue, substitution, and extension applications, execute all necessary assignment papers to cause any and all of patents directed to the Invention to be issued to the Assignee, to make all rightful oaths, and to generally do everything reasonably possible to aid the Assignee, and its successors and assigns, to obtain and enforce proper protection for the Invention in the United States and in any and all foreign countries.

This Assignment includes the right, if any, for the Assignee to sue or bring other actions for past, present and future infringement of the Intellectual Property. Furthermore, this Assignment shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document that may be required in any country for any purpose regarding the subject matter hereof.

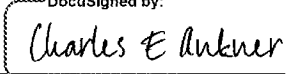

The Inventor shall be entitled to a share of royalties and other proceeds that stem from the subject matter identified in Exhibit A should said subject matter be present in at least one claim of a granted patent and the Inventor contributed to said subject matter. Exhibit A is merely outlining a general starting point for good-faith negotiations for a subsequent formal agreement. Thus, Exhibit A is not legally binding.
