To the extent not previously conveyed, assigned and transferred to Assignee, Assignor desires to assign and Assignee desires to acquire the entire right, title and interest in and to the assets and rights conveyed, assigned and transferred pursuant to this Assignment of Patent Rights, effective as of the date of such earlier executed assignment (this "*Assignment*").

Therefore, for valuable consideration, the receipt and sufficiency of which Assignor acknowledges, Assignor hereby irrevocably and unconditionally conveys, assigns and transfers to Assignee, and to Assignee's successors and assigns, the full extent of all right, title, and interest in and to any and all of the following (the "*Rights*") not previously conveyed, assigned and transferred to Assignee effective as of the date of such earlier executed assignment:

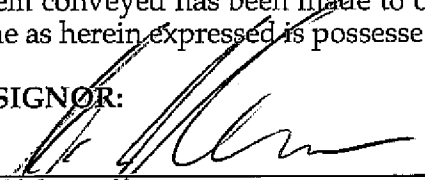

- a. The Inventions and all rights in any country of the world with respect to the Inventions;
- b. The Application;
- c. All letters patent, United States patents or other governmental grants or issuances that may be granted or issue with respect to the Inventions (collectively, the "*Patents*");

- e. All reissues, requests for continuing examinations, reexaminations, extensions or registrations of the Additional Applications and/or the Patents;
- f. All non-United States patents, patent applications, and counterparts with respect of the Inventions, the Additional Applications, and the Patents including, without limitation, certificates of invention, utility models, industrial design protection, design patent protection, and other governmental grants or issuances, and including the right to file foreign applications directly in the name of Assignee;
- g. The right to claim priority rights deriving from the Patents and/or Additional Applications and for Assignee to otherwise avail itself of the provisions of the international conventions governing the protection of inventions;
- h. All causes of action, remedies and other enforcement rights related to the Additional Applications, the Inventions, and the Patents (including, without limitation, the right to sue for past, present or future infringement, misappropriation or violation of rights related to the Additional Applications, the Inventions, and the Patents);
- i. All rights to collect royalties and other payments under or on account of any of the Additional Applications, the Inventions, and the Patents;
- j. Any and all other rights and interests arising out of, in connection with, or in relation to the Additional Applications, the Inventions, and the Patents; and

- k. All documents related to the conception, diligence and reduction to practice of the Inventions and all domestic and international patent filing documents.

Assignor agrees that, promptly upon request of Assignee, its successors or assigns, to execute and deliver without further compensation any power of attorney, assignment, application, whether original, continuation, divisional or reissue, or other papers which may be necessary or desirable to fully secure to Assignee, its successors and assigns, the Rights and all patent rights therein, in the United States and in any country foreign thereto, and to cooperate and assist in the prosecution, of interference proceedings involving the Rights and in the adjudication or reexamination of the Patents provided the expenses which may be incurred by Assignor in lending such cooperation are paid by Assignee.
