PADEN, an individual ("Paden", together with Ricci, the "Assignees"), with reference to the following facts:

RECITALS:

A. Assignor is the owner of the following patents: (i) U.S. Patent No. 8,823,238, known as "Winding Arrangement for an Electrical Machine," registered September 2, 2014; (ii) U.S. Patent No. 10,141,822 B2, known as "Axial Flux Brushless Permanent Magnet Electrical Machine Rotor," registered November 27, 2018; (iii) U.S. Patent No. 10,468,955, known as "Axial Flux Brushless Permanent Magnet Electrical Machine Rotor"; (iv) U.S. Patent No. 10,574,110, known as "Lightweight and Efficient Electrical Machine and Method of Manufacture", and (v) U.S. Patent Application No. 63,026,245, known as "Modulated litz wire construction for high-power-density motors" (collectively, the "Patents").

B. Ricci and Paden are employees of Assignor, and Assignor owes Ricci \$68,406 (the "Ricci Debt") and Paden \$96,093 (the "Paden Debt", together with the Ricci Debt, the "Debt"), and the parties have elected to execute this Assignment in order to memorialize Assignor's assignment to Assignees of all of Assignor's right, title and interest in and to the Patents.

ASSIGNMENT:

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, Assignor hereby:

1. Sells, assigns and transfers unto Assignee, for the use of Assignees and their successors and assigns, the entire right, title and interest of Assignor in and to the Patents, and all divisions and continuations thereof, and all United States Letters Patents which may be granted thereon and all reissues, reexaminations and extensions thereof, together with all claims for damage by reason of past infringement of said Patents (including the right to sue for and collect the same for the use and enjoyment of Assignee and its successors, assigns or other legal representatives), and all priority rights under all available International Agreements, Treaties and Conventions for the protection of intellectual property in its various forms in every participating country, and all applications for patents (including related rights such as utility-model registrations, inventor's certificates and the like) heretofore or hereafter filed for the inventions claimed in the Patents and all improvements thereon in any foreign countries, and all patents (including all continuations, divisions, extensions, renewals, substitutes and reissues thereof) granted for said improvements in any foreign countries.

2. Authorizes and requests that the United States Commissioner of Patents and Trademarks and any officials of foreign countries whose duty it is to issue patents on applications as aforesaid, to register the Patents in the name of Assignees.

3. Represents and warrants that Assignor has full right and lawful authority to transfer the entire interest of Assignor as described in Section 1, above.

4. Assignees agree to accept the Patents in exchange for the cancellation of the Debt owed by Assignor to Assignees.

5. Covenants and agrees to make, execute, and deliver such documents and instruments and to take such further actions as may be necessary or convenient for effectuating the foregoing Assignment.

6. This Assignment shall be governed by and construed in accordance with the internal laws of the State of California (without regard to the conflict-of-law principles thereunder). This Assignment (a) represents the entire understanding between the parties regarding the subject matter hereof, and supersedes and replaces all prior and contemporaneous understandings, whether oral or written, regarding such subject matter, and (b) may not be modified or amended, except by a written agreement executed after the effective date hereof by the party sought to be charged by such modification or amendment. This Assignment may be executed in counterparts, each of which shall be deemed an original and both of which, taken together, shall constitute one and the same instrument, binding on each signatory thereto. A copy of this Assignment that is executed by a party and transmitted by that party to the other party by facsimile or as an attachment (e.g., in "DocuSign" ".tif" or ".pdf" format) to an email shall be binding upon the signatory to the same extent as a copy hereof containing that party's original signature.
