ASSIGNMENT OF RIGHTS: PATENT APPLICATION

Peter Lablans ("Assignor") is the inventor and owner of 'Cryptographic Machines Characterized by a Finite Lab-Transform (FLT)', as described in the U.S. Patent Application filed by Assignor in the U.S. Patent and Trademark Office under Serial Number: 16/717,691 filed December 17, 2019, (the "Patent Application"), confirmation number 7132, also known as Attorney Docket LAB0021-01CP. Ternarylogic LLC of Morristown, NJ, ("Assignee") desires to acquire all rights in and to the Patent Application and the patent that will be granted on this allowed patent application.

Therefore, for agreed upon consideration, which is acknowledged, Assignor assigns to Assignee 100% of his right, title, and interest in the invention and Patent Application to Assignee for the entire term of the issued Patent and any reissues or extensions that may be granted and for the entire terms.

Assignor authorizes the United States Patent and Trademark Office to issue the Patent resulting from the Patent Application to Assignee according to the percentage interest indicated in this assignment. The right, title and interest is to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignor had this assignment not been made.

Assignor further agrees to: (a) cooperate with Assignee in the prosecution of the Application; (b) execute, verify, acknowledge and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention and for adequate compensation.

Date: April 1, 2022
