ASSIGNMENT

WHEREAS **GILLIS, Andrew**
of **Surrey, BC**

hereinafter referred to as "Assignor", is an inventor for certain new and useful improvements in an invention described and set forth in a PCT patent application entitled PARTICLE SEPARATION BY DENSITY (hereinafter the "Invention") filed on April 19, 2021 and assigned application no. PCT/CA2021/050528 (hereinafter referred to as the "Application") claiming priority from United States provisional patent application no. 63/013,289 filed on April 21, 2020;

AND WHEREAS the Assignor has agreed to sell, assign and transfer and has sold, assigned and transferred all of their right, title and interest in and to the Invention and all patent rights throughout the world in connection therewith, including any letters patent which may be granted in connection with the Invention, to and unto:

SEPRO MINERAL SYSTEMS CORP.
101a 9850 201st St
Langley, BC
Canada V1M 4A3
(the "Assignee");

NOW, THEREFORE, TO ALL WHOM IT MAY CONCERN, be it known that, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged by the Assignor, the Assignor confirms that the Assignee and Assignee's successors and assigns are entitled to ownership of the Application and the Invention for Canada, the United States, and all jurisdictions throughout the world and the Assignor confirms having sold, assigned, transferred and set over unto the Assignee, effective at least as early as April 18, 2021, and hereby does sell, assign, transfer and set over unto the Assignee and Assignee's successors and assigns, effective at least as early as April 18, 2021, all of their right, title, and interest in and to the Invention, all changes, improvements, and advancements relating to the Invention, the Application, all patent applications and patents relating to any of the foregoing, including all divisionals, continuations, continuations-in-part, international applications, national phase entry applications, renewals, substitutions, conversions, prolongations, extensions, provisionals, and/or reissues of and/or relating to any of the foregoing in all countries, regions, and other jurisdictions throughout the world, all rights to file any of the foregoing patent applications, all rights arising under any and all intellectual property treaties throughout the world in relation to any of the foregoing, all rights of priority and priority claims resulting from or related to any of the foregoing, all patents issuing on and/or from any of the foregoing, and all rights to sue for and recover damages, including royalties, for any past, present or future infringement of any patent application or patent identified above (collectively hereinafter the "Assigned Patent

Rights"), the right, title, and interest to be held and enjoyed by said Assignee and Assignee's successors and assigns as fully and exclusively as the right, title, and interest would have been held and enjoyed by said Assignor had an assignment and transfer not been made, to the full end and term of any and all of the Assigned Patent Rights. Assignor represents and warrants that Assignor has the full right to convey the entire right, title, and interest herein sold, assigned, transferred, and set over to the Assignee, that there are no rights or interests outstanding inconsistent with the right, title, and interests granted herein, and that Assignor has not granted or provided and will not grant or provide to others any right, title, or interest inconsistent with the right, title, and interest granted herein.

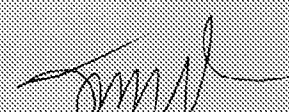

Assignor further agrees that the Assignor will, without charge to the Assignee, or Assignee's successors and assigns, but at the expense of the Assignee, or Assignee's successors and assigns, cooperate with the Assignee, or Assignee's successors and assigns, in the prosecution of the Application and/or applications related to said Assigned Patent Rights, execute, verify, acknowledge, and deliver all such further papers and/or documents, including applications for patent, registration, or other rights and for the reissue thereof, and instruments of assignment and transfer thereof, and will perform such other acts as Assignee, or Assignee's successors and assigns, lawfully may request, to obtain and/or maintain any and all of the Assigned Patent Rights and to vest title thereto in said Assignee, or Assignee's successors and assigns.

ASSIGNOR:

Executed at Langley (city), BC (province),
Canada, this 20th day of May (month), 2021.

GILLIS, Andrew
