## ASSIGNMENT OF INVENTION AND PATENT RIGHTS

Pursuant to my obligations to Clark Equipment Company, a North Dakota company, having a place of business at 250 East Beaton Drive, West Fargo, ND 58078 (hereinafter referred to as “Assignee”), and for other valuable and sufficient consideration, receipt of which is hereby acknowledged, I:

Daniel J. Krieger  
3250 Keith Drive  
Bismarck, ND 58503  
U.S.

confirm my obligations to, and hereby do, sell, assign and convey unto the Assignee, its successors and assigns, my entire right, title and interest:

(1) in and to an invention entitled “MECHANICAL SELF-LEVELING LIFT ARM STRUCTURE FOR POWER MACHINE” (Disclosure B2018-0041-PR1) for which I have executed United States Patent Application Serial No. 62/798,806, filed January 30, 2019 (Atty. File No. 169402.00002) (hereinafter the “Priority Application”);

(2) in and to the Priority Application, in and to all other patent applications (including divisional, continuation, continuation-in-part, §111(b) provisional, §111(a), and reissue applications) based upon said invention or claiming priority to the Priority Application, and in and to the patent or patents to be granted thereon, including reissues thereof, if any, to the full end of the term or terms for which said patent or patents may be granted;

(3) in and to all patent applications on said invention now or hereafter filed in countries foreign to the United States of America, including applications claiming priority to any of the applications listed above, and in and to any and all patents granted on said applications to the full end of the terms for which said patents may be granted; and

(4) under the Paris and Stockholm Conventions, the Patent Cooperation Treaty, and any successor agreements thereto, with respect to the invention, the Priority Application and all other applications listed above; and

(5) in the right to sue for past, present, and future infringement of any patents obtained for the invention or from any of the applications listed above.

I further hereby agree that any patent applications of any foreign countries which may be filed on the invention shall be filed in the name of the Assignee with a claim to priority, as appropriate under the Assignee's sole discretion, based on the Priority Application.

And I represent that I have the full right and authority to assign the rights assigned herein and hereby agree that I will, upon demand of Assignee, its successors or assigns, and without further consideration to us, execute any and all papers that may be necessary, or deemed by Assignee, its successors or assigns, to be necessary, to a complete fulfillment of the intent and purposes of this Assignment, it being understood that any reasonable expense incident to the execution of such papers shall be paid by the Assignee, its successors and assigns, and not by us.

Further, I agree that this assignment shall be binding on my heirs, assigns, representatives, and successors, and shall extend to the successors, assigns, and nominees of the Assignee at the sole discretion of the Assignee. And, to the extent that the filing date(s) and application number(s) for the Priority Application(s) are not known upon execution of this assignment, I authorize the Assignee or the attorneys of record in the Priority Application(s) to insert in this document the filing date(s) and application number(s) of the Priority Application(s) when such information is known.

The Commissioner of Patents and Trademarks of the United States and the authorities of all other patent offices worldwide are hereby authorized and requested to issue all patents on the invention to the Assignee.
