Exhibit A

This Patent Assignment (this "Assignment"), effective as December 4, 2020 (the "Effective Date"), is entered into by and between Uber Technologies, Inc., a Delaware corporation ("Uber"), and UATC, LLC, a Delaware limited liability company ("ATG"). Uber and UATC are sometimes referred to herein individually as a "Party" and collectively as the "Parties."

WHEREAS, Uber and ATG entered into a First Amendment to the IP Matters Agreement (the "Amendment") that effectuated an "Uber-to-ATG Transfer," pursuant to which, among other things, ATG transferred and assigned to Uber all of ATG's right, title and interest in and to the patents and patent applications listed on the attached Schedule 1 (the "Transferred Patents");

NOW THEREFORE, for good and valuable consideration, the receipt of which is acknowledged, ATG hereby assigns and transfers to Uber all of its right, title and interest in and to the Transferred Patents including in and to any and all divisionals, continuations, continuations-in-part, substitutes, reexaminations, renewals, reissues and patents which have or which may be filed thereon or may be granted therefor, including any and all counterparts worldwide, including all right, title and interest in and to all income, royalties, damages and payments now or hereafter due or payable with respect to the Transferred Patents, and all causes of action (whether in law or equity) and the right to sue, counterclaim, and recover for the past, present and future infringement of the Transferred Patents. The Transferred Patents and all patents that issue on the Transferred Patents shall be held and enjoyed by Uber, its successors and assigns as fully and entirely as the same would have been held and enjoyed by ATG had this assignment not been made.

ATG agrees that if requested by Uber, without charge to either of them but at the cost and expense of Uber, ATG will perform any reasonable action which may be necessary to secure and to vest in Uber the full and entire right, title and interest in, to and under the Transferred Patents, including promptly communicating and providing any and all known and accessible facts, data or any other pertinent information thereof and promptly executing and delivering any and all papers, documents, forms, declarations, oaths, affidavits and other legal instruments.

ATG authorizes and requests the Commissioner for Patents in the United States Patent and Trademark Office, and any official of any country or countries, whose duty it is to issue patents or other evidence or forms of industrial property protection on applications as aforesaid, to record and register this Assignment upon request by Uber, its successors, legal representatives and assigns, in accordance with the terms of this instrument.

Exhibit B

This Patent Assignment (this "**Assignment**"), dated and effective as of the latest date of the signatures (the "**Effective Date**"), is entered into by and between Uber Technologies, Inc., a Delaware corporation ("**Uber**"), and UATC, LLC, a Delaware limited liability company ("**ATG**"). Uber and UATC are sometimes referred to herein individually as a "**Party**" and collectively as the "**Parties**."

WHEREAS, Uber and ATG entered into a First Amendment to the IP Matters Agreement (the "**Amendment**") that effectuated an "Uber-to-ATG Transfer," pursuant to which, among other things, ATG transferred and assigned to Uber all of ATG's right, title and interest in and to the patents and patent applications listed on the attached Schedule 1 (the "**Transferred Patents**").

NOW THEREFORE, for good and valuable consideration, the receipt of which is acknowledged, ATG hereby assigns and transfers to Uber all of its right, title and interest in and to the Transferred Patents including in and to any and all divisionals, continuations, continuations-in-part, substitutes, reexaminations, renewals, reissues and patents which have or which may be filed thereon or may be granted therefor, including any and all counterparts worldwide, including all right, title and interest in and to all income, royalties, damages and payments now or hereafter due or payable with respect to the Transferred Patents, and all causes of action (whether in law or equity) and the right to sue, counterclaim, and recover for the past, present and future infringement of the Transferred Patents. The Transferred Patents and all patents that issue on the Transferred Patents shall be held and enjoyed by Uber, its successors and assigns as fully and entirely as the same would have been held and enjoyed by ATG had this assignment not been made.

ATG agrees that if requested by Uber, without charge to either of them but at the cost and expense of Uber, ATG will perform any reasonable action which may be necessary to secure and to vest in Uber the full and entire right, title and interest in, to and under the Transferred Patents, including promptly communicating and providing any and all known and accessible facts, data or any other pertinent information thereof and promptly executing and delivering any and all papers, documents, forms, declarations, oaths, affidavits and other legal instruments.

ATG authorizes and requests the Commissioner for Patents in the United States Patent and Trademark Office, and any official of any country or countries, whose duty it is to issue patents or other evidence or forms of industrial property protection on applications as aforesaid, to record and register this Assignment upon request by Uber, its successors, legal representatives and assigns, in accordance with the terms of this instrument.
