PATENT ASSIGNMENT

PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "*Assignment*") made effective as of December 31, 2020 (the "*Effective Date*"), is executed by SOUTHWEST AGRI-PLASTICS, INC, a Texas corporation ("*Assignor*"), in favor of DURAPLAS, LP, a Texas limited partnership ("*Assignee*"), collectively referred to as the "*Parties*").

WHEREAS, Assignor owns the entire right, title and interest in and to the granted patents, and patent applications registrations (hereinafter referred to collectively as the "*Patents*") listed on the attached Schedule 1; and

WHEREAS, Assignee desires to acquire the entire right, title, and interest in and to said Patents, and in and to any patent or patents that may issue thereon, rely thereon, or claim priority therefrom;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor assigns to Assignee, all right, title, and interest in and to said Patents, including also, for example, all right, title, and interest in and to all patent applications that claim priority therefrom, all patents which may be granted therefor, or which claim priority therefrom or rely thereon, including, for example, all divisions, continuations, continuations-in-part, reissues, reexaminations, utility models, industrial designs, and extensions thereof, whether in the United States or elsewhere in the world. Assignor authorizes and requests the United States Patent and Trademark Office and all foreign patent offices (or other patent issuing authorities) to issue all patents for said Patents, or patents resulting therefrom, or claiming priority or relying thereon, insofar as Assignor's interest is concerned, to Assignee, its successors and assigns.

Assignor also assigns to Assignee, all right, title, and interest in and to the Patents throughout the world, including the United States and its territorial possessions and in all foreign countries, including all rights to claim priority, in and to any and all subject matter that is disclosed in said Patents, and the right to file applications and obtain patents, utility models, industrial models, and designs for said Patents in its own name throughout the world, including all rights to publish cautionary notices reserving ownership of said Patents and all rights to register said Patents in appropriate registries, and Assignor further agrees to execute any and all applications, assignments, declarations, affidavits, and any other papers in connection therewith necessary to perfect such right, title, and interest in Assignee, and Assignor hereby grants Assignee power of attorney to execute any and all such documents on behalf of Assignor.

Assignor hereby assigns to Assignee any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any of the Patents; and any and all claims and causes of action with respect to any of the Patents, whether accruing before, on, or after the last date indicated below, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, with the right but not the obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

PATENT ASSIGNMENT

Assignor will testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, continuation-in-part, reissue, and substitute applications, make lawful oaths, declarations, and affidavits and generally do everything possible to vest title in Assignee and to aid Assignee to obtain and enforce proper protection for said Patents and in all countries. Assignor shall not communicate nor cooperate in any manner with any third party, other than Assignee, that claims any rights in and to said Patents.

Assignor represents and covenants that no assignment, mortgage, sale, license, pledge, encumbrance, or alienation of said Patents has been or will be made or entered into which would conflict with this assignment and sale. Assignor represents and covenants that Assignor has the full right, title, and interest to fully and completely convey all Patents throughout the world, and the Assignor is not legally obligated, in any manner, to convey such Patents to any third party.

This Patent Assignment shall be binding on the parties' successors, assigns, and legal representatives and shall be interpreted according to the laws of the State of Texas, United States of America, without regard to the application of any law, rule or regulation that would result in the application of the law of another jurisdiction.
