Patent Application Assignment

The undersigned ASSIGNEE is desirous of acquiring from the undersigned ASSIGNOR the ASSIGNOR's entire right in, title to, and interest in a patent application titled *Fixed-Bed Bioreactor With Constant-Flow Pump/Tubing System*, for which a United States Provisional Patent Application was filed on 14 April 2016, Application Serial Number US62/322651.

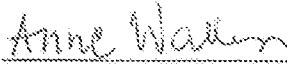

Now, therefore, in consideration of the sum of good and valuable consideration, the receipt and adequacy of which is acknowledged by the Assignor, by these presents Assignor does sell, assign and transfer unto said Assignee, effective as of the above-listed patent application filing date, the full and exclusive right to: (a) the said invention(s) world-wide, and the entire right, title and interest in and to any and all patents which may be granted therefore world-wide; (b) any related patent application(s) (e.g. reissue, continuation-in-part, continuation, et cetera) and the entire right, title and interest in and to any and all patents which may be granted therefore; and (c) any and all patent applications and issued patents asserting priority to, or providing priority to, the above-listed patent application(s), and the entire right, title and interest in and to any and all patents which may be granted therefore. Assignor hereby authorizes and requests the Director of Patent and Trademarks to issue said patents to Assignee for its exclusive use and benefit, and for the use and benefit of its legal representatives, to the full end of the term (including extensions) for which said patents may be granted, as fully and entirely as the same would have been held by Assignor had this assignment not be made.
