Colin MARSHALL

of 55 Nelson Court, Aberdeen, Aberdeenshire, AB24 5BF, United Kingdom

James Peter SINCLAIR

of 2nd Flat/Right, 77 Urquhart Road, Aberdeen, Aberdeenshire, AB24 5ND, United Kingdom

Thomas Craven BADDELEY

of 50 Union Grove, Aberdeen, Aberdeenshire, AB10 6RX, United Kingdom

2 'The University'

The University Court of the University of Aberdeen

of University Office, Regent Walk, Aberdeen AB24 3FX, United Kingdom

3 'The Assignee'

TauRx Therapeutics Ltd

(a corporation organised under the laws of Singapore)

of 51 Ayer Rajah Crescent, #07-01/02, Singapore 139948

Recitals:

(A) The Inventors are the joint inventors of the invention or inventions entitled METHODS OF SYNTHESIS AND/OR PURIFICATION OF DIAMINOPHENOTHIAZINIUM COMPOUNDS (hereinafter referred to as "the Invention") the specification of which was filed on 11 July 2006 in the USPTO as United States Patent Application No. 60/819,627 (hereinafter referred to as "the Application").

(B) The Inventors are (and were at all material times) employed by the University to carry out the research from which the Invention arose.

(C) The Inventors have agreed to execute this Assignment in order to confirm and ensure that, as between them and the University, their contributions to the Invention belong to the University.

(D) The Invention arose out of a research and development programme conducted by the University and the Assignee which is the subject of an Agreement between them dated 27 September 2002 and extended until 31 December 2006 by an Addendum dated 10 January 2005 ("the RDLA").

(E) Under clause 4.2 of the RDLA, all inventions and patent rights invented or created in the course of the said research and development programme shall be owned solely and exclusively by the Assignee.

(F) In pursuance of the RDLA the University has agreed to execute this Assignment in order to confirm and ensure that the contributions to the Invention made by the University Inventors belong to the Assignee.

(G) The Application has been filed in the name of the Inventors, as required by US law.

(H) The Inventors and the University have agreed to execute this Assignment of all their respective rights title and interest in to and under the Application to the Assignee.

Operative provisions:

1 In consideration for the payment of £1.00 by the University to each of the Inventors (the receipt and adequacy of which are hereby acknowledged) the Inventors hereby sell and assign to the University absolutely and free from incumbrances all their rights title and interest in Canada and the United States and all other countries of the world in to and under the Invention.

2 In consideration for the payment of £1.00 by the Assignee to the University (the receipt and adequacy of which are hereby acknowledged) the University hereby sells and assigns to the Assignee absolutely and free from incumbrances all its rights title and interest in Canada and the United States and all other countries of the world in to and under the Invention.

3.1 In consideration for the payment of £1.00 by the Assignee to the Inventors and the University (the receipt and adequacy of which are hereby acknowledged) the Inventors and the University hereby sell and assign to the Assignee absolutely and free from incumbrances all their rights title and interest in to and under the Application including any divisionals, continuations, continuations-in-part, re-issues, re-examinations, renewals, and extensions thereof, and including the right to apply for prosecute and obtain patent and other industrial property protection throughout the world in respect of the invention or inventions which are the subject of the Application and the right to claim priority from the Application in any and all such applications, and any and all patents that may be granted pursuant to any of the aforesaid applications for the full period thereof including any re-issues, re-examinations,

renewals, extensions and Supplementary Protection Certificates, and including all rights and powers arising or accrued from any of the aforesaid patents and applications including the right to sue for damages and other remedies in respect of any infringement of any such rights before on or after the date hereof and to retain any damages obtained as a result of such action; the said interest being the entire ownership of all said Letters Patent when granted, to be held and enjoyed by the Assignee to the full end of the term for which the said Letters Patent may be granted, as fully and entirely as the same would have been held and enjoyed by the Inventors if this assignment had not been made.

3.2 The Inventors and the University authorize and request the Commissioner of Patents to issue the said Letters Patent to the Assignee.

3.3 For the consideration aforesaid, the Inventors and the University agree that they will, upon request, communicate to the Assignee or the representatives thereof any facts known to them respecting the invention or improvements of the Application, and will, upon request, but without expense to the Inventors, testify in any legal proceedings, sign all lawful papers, execute all divisional, continuation, reissue, re-examination, renewal and extension applications, and generally do all other and further lawful acts deemed necessary or expedient by the Assignee or by counsel for the Assignee to assist or enable the Assignee to obtain and enforce full benefits from the rights and interests herein assigned.

4 The Inventors and the University hereby GRANT the firm of Mewburn Ellis LLP the power to insert in the Schedule to this Assignment any further identification of any future patent applications in Canada or the United States or any other countries or regions of the world which shall fall within the scope of clause 3 above, as may be necessary or desirable in order to comply with the rules of the United States Patent Office or the Canadian Patent Office or any other Patent Office for recordation of this document. It is understood and agreed that the Assignee's attorneys Mewburn Ellis LLP have represented only the Assignee and will continue to represent only the Assignee with respect to this invention.

5 The University and the Inventors hereby UNDERTAKE that at the request and cost of the Assignee or its successors or assigns they will at all times hereafter promptly do all such acts and execute all such documents (including but not limited to documents required to be signed by or on behalf of inventors in the course of any and all Canadian and United States patent applications which relate to the Invention and any and all divisionals, continuations and continuations-in-part of any such applications) as may be reasonably necessary or desirable to secure the vesting in the Assignee or its successors or assigns of all rights title and interest

assigned to the Assignee hereunder and to confirm the title of the Assignee or its successors or assigns to all such rights title and interest and to assist in the resolution of any question concerning the Invention or any application for patent or other intellectual property protection for the Invention or any intellectual property protection granted pursuant to any such application.

6 The University and the Inventors hereby request the relevant authorities in all countries of the world to issue any patents granted for the Invention in the name of the Assignee or its successors or assigns in accordance with this assignment.

7 This assignment and undertaking shall be binding upon the University's and the Inventors' heirs, executors, administrators, successors and/or assigns and shall enure to the benefit of any heirs, executors, administrators, successors and/or assigns of the Assignee.

AS WITNESS the signatures of (or of duly authorised officers of) the parties hereto
