(1) in and to inventions described in a patent application titled "CLOUD-CONNECTED SMART SENSING AND MEASUREMENT METHOD FOR RESOURCE DISPENSERS" for which I filed U.S. Patent Application No. 17/538,461, on November 30, 2021 (Atty. (2) in and to the U.S. patent application, in and to all other patent applications (including divisional, continuation, continuation-in-part, 35 U.S.C. § 111(b) provisional, 35 U.S.C. § 111(a), and reissue applications) based upon said inventions, and in and to the patent or patents to be granted thereon, to the full end of the term or terms for which said patent or patents may be granted;

(3) in and to all patent applications on said inventions filed in countries foreign to the United States of America, and in and to any and all patents granted on said applications to the full end of the terms for which said patents may be granted; and

(4) under the International Convention in respect to the U.S. patent application and agree that any patent applications of any foreign countries which may be filed shall be filed in the name of the Assignee with a claim to priority based on the U.S. patent application; and

(5) in and to all rights of any kind whatsoever of Assignors' accruing before, on, or after the dates of execution below under any of the foregoing provisions provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world, acknowledging that some rights may have already accrued to the Assignee under such applicable laws; and
