We, Menasha Corporation, a corporation organized and existing under the laws of the State of Wisconsin, and having its principal offices at 1645 Bergstrom Road, Neenah, Wisconsin, 54956, and Bradly Thomas Schultz, hereby declare that this assignment is directed to the following application:

U.S. Patent Application Serial Number 14/213,416, filed on March 14, 2014

In consideration of the sum of One Dollar (\$1.00) and other good and valuable considerations, the receipt of which is hereby acknowledged, we hereby do sell, assign, and transfer to TIDI Products, LLC (hereinafter referred to as "assignee"), a limited liability company organized and existing under and by virtue of the laws of the state of Delaware and having its principal place of business at 570 Enterprise Drive, Neenah, WI 54956, its successors and assigns, our entire right, title, and interest in the invention as acquired by us, to the above-identified invention as set forth in the application for Letters Patent therefore and any divisions or continuations thereof, and any Letters Patent obtained for the invention in the United States and foreign countries, or issuing out of the application or any such division or continuation thereof, and any reissues or extensions of any such Letters Patent.

The Commissioner of Patents is hereby authorized and requested to issue Letters Patent for the invention to the assignee, as assignee of the entire right, title, and interest therein.

We covenant that we have full right to convey our entire title and interest in the invention, and that we have not executed and will not execute any agreement in conflict herewith.

We further covenant that we will, at any time, upon request, execute and deliver any and all papers that may be necessary or desirable to perfect the title in assignee to the invention or any Letters Patent that may be granted therefore, and that, if assignee or its assignee desires to make a substitute, divisional, or continuation application for the invention, or to secure a reissue or extension of the Letters Patent, to file a disclaimer relating thereto, or an application for a corresponding patent in any foreign country, we will, upon request, sign all papers, make all rightful oaths, and do all lawful acts requisite for the purpose, but at the expense of the assignee.

We further covenant that we will at all times do such acts and execute such papers, without expense to ourselves, as may be necessary or desirable in order to fully protect the invention for the benefit of the assignee, its successors or assigns, and to otherwise carry into full force and effect the text and interest of this assignment.

We further covenant and acknowledge that the entire beneficial interest in the invention to which the above-referenced application relates is irrevocably vested in the assignee including the right to make applications for protection in all countries abroad and to claim priority under the International Convention for such applications and hereby assent to the making of any such applications, with or without priority claim, and of any divisional applications resulting therefrom.

We further covenant that we will at all times communicate to the assignee, its successors, assigns, or legal representatives, all facts relating to the invention and Letters Patent, or the history thereof, known to me, and testify as to the same in administrative actions or other litigation when requested so to do.

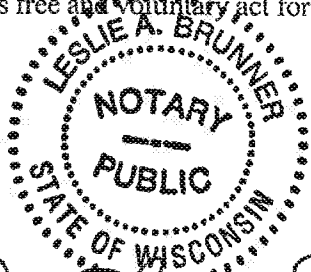

We hereby authorize the assignee or the attorney of record to insert the filing date and serial number of the application in this instrument.
