## ASSIGNMENT

**WHEREAS**, we, the undersigned, **Garrett Hill**, an individual residing in Boulder, Colorado, and **Andrew Murray**, an individual employed by Plasma Flow, LLC (collectively referred to as “ASSIGNORS”) have invented “**INDUCTION FEED THROUGH SYSTEM**”, for which an application for patent has been filed in the United States, Application Serial No. **17/781298**, filed **May 31, 2022**, which together with related experimental data, trade secret, and other know-how are collectively referred to as the “INVENTION”;

**WHEREAS**, **Plasma Flow, LLC**, a **limited liability corporation** having its principal place of business at 1255 Rock Creek Circle, Lafayette, Colorado 80026 (referred to as “ASSIGNEE”), is desirous of acquiring all entire right, title and interest in, to and under the INVENTION, and in, to and under all patents and any similar legal protections based on the INVENTION to be, or having been, obtained therefor in the United States of America, its territorial possessions, and in any and all countries foreign thereto;

**NOW, THEREFORE**, for good and valuable consideration, the receipt and legal sufficiency of which ASSIGNORS hereby acknowledged, ASSIGNORS hereby assign, transfer and set over unto the ASSIGNEE, its successors and assigns, the entire right, title and interest in and to (1) the INVENTION, and to (2) all patents, patent applications, and similar legal protections based on the INVENTION, not only in the United States and its territorial possessions, but in all countries foreign thereto, including any continuations, continuation-in-parts, divisionals, renewals, substitutes, reissues or reexaminations thereof or any legal equivalents thereof in a foreign country for the full term or terms for which the same may be granted, and including all priority rights under any International Convention, and to (3) the right to sue for past infringement of the INVENTION;

ASSIGNORS hereby covenant that no assignment, sale, agreement or encumbrance has been or will be made or entered into which would conflict with this assignment;

ASSIGNORS further covenant that ASSIGNEE will, upon its request, be provided promptly with all pertinent facts and documents relating to the INVENTION, including all patent applications, patents, and legal equivalents in foreign countries based on the INVENTION as may be known and accessible to ASSIGNORS, and will testify as to the same in any administrative proceeding or litigation related thereto, and will promptly execute and deliver to ASSIGNEE, or its legal representatives, any and all papers, instruments or affidavits required to apply for, obtain, maintain, issue and enforce the INVENTION, including all patents, patent applications, and similar legal protections based on the INVENTION, not only in the United States and its territorial possessions, but in all countries foreign thereto.

ASSIGNORS and ASSIGNEE each covenant to perform all acts and execute and deliver all documents as may be necessary or appropriate to carry out the intent and purposes of this assignment.

This assignment embodies the entire understanding of ASSIGNORS and ASSIGNEE and supersedes and replaces any and all pre-existing assignments or understandings between ASSIGNORS and ASSIGNEE. No amendment or modification of this assignment shall be valid

or binding upon ASSIGNORS or ASSIGNEE unless made in writing and signed on behalf of each of ASSIGNORS and ASSIGNEE by their respective duly authorized representative.

ASSIGNORS acknowledge that ASSIGNEE may appoint any attorney or practitioner of ASSIGNEE'S choice to prosecute any patent application or other administrative or legal proceeding involving the INVENTION and ASSIGNORS further acknowledge that any attorney or practitioner so appointed by ASSIGNEE does not represent ASSIGNORS and that such appointment by ASSIGNEE does not create any attorney-client relationship between ASSIGNORS and any attorney or practitioner appointed by ASSIGNEE.

This assignment may be executed in any number of counterparts, each of which shall be deemed an original but all of which together shall constitute one and the same instrument.
