INTELLECTUAL PROPERTY ASSIGNMENT

(“Assignment”)

WHEREAS, Abrado, Inc., a Texas corporation (“**Buyer**”), has purchased certain assets of Deltide Energy Services, LLC, a Delaware limited liability company, Deltide Fishing & Rental Tools, Inc., a Louisiana corporation, and Rattler Tools, Inc., a Louisiana corporation (collectively, “**Seller**”), pursuant to an Asset Purchase Agreement, dated June [22], 2016, by and between Buyer, Seller and the other parties thereto (“**Asset Purchase Agreement**”); and

WHEREAS, **Seller** owns, by assignment or otherwise, all right, title, and interest in and to certain intellectual property associated with the Acquired Assets (as defined in the Asset Purchase Agreement); and

WHEREAS, pursuant to its obligations under the Asset Purchase Agreement, **Seller** now wishes to assign to **Buyer** all of its worldwide right, title, and interest in and to the intellectual property set forth on Schedule 1 attached hereto (collectively, the “**Intellectual Property**”);

NOW THEREFORE, be it known that, in exchange for payments made under the Asset Purchase Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged;

SELLER HEREBY irrevocably assigns, transfers, conveys, grants and sets over to **Buyer**, and its successors and assigns, **Seller’s** entire right, title, and interest in and to the Intellectual Property and any and all intellectual property rights inherent in the Intellectual Property and appurtenant thereto including, without limitation, all domestic and foreign patent rights (including, without limitation, patent applications, inventions claimed and disclosed therein, and any future applications that may rely on such patents and/or patent applications for priority and related inventions), copyrights, and rights in trademarks, service marks and trade dress, including all goodwill associated therewith, whether existing now or in the future; and

SELLER HEREBY authorizes and requests the Commissioner of Patents and Trademarks of the United States, and any official of any foreign country whose duty it is to issue, assign, and/or record patent assignments, to issue registrations for the Intellectual Property in the name of **Buyer** and to record this Assignment and record **Buyer** as assignee of all the Intellectual Property in accordance with the terms of this Assignment; and

SELLER HEREBY further covenants and agrees that, from and after the date of this Assignment, **Buyer** has succeeded to all of **Seller’s** right, title, interest and standing to receive all rights and benefits pertaining to the Intellectual Property, institute and prosecute all suits and proceedings, take all actions that **Buyer**, in its sole discretion, may deem necessary or proper to collect, assert, or enforce any claim, right, title or interest of any kind under any and all of the Intellectual Property, including, without limitation, the right to sue for all past, present and future infringements or other violations of any rights relating thereto, to settle, defend, compromise and retain proceeds from any actions, suits, or proceedings relating to the transferred and assigned rights, title, interest, and benefits, and do all other such acts and things in relation thereto as **Buyer**, in its sole discretion, deems advisable, the same to be held and enjoyed by **Buyer** and its successors and assigns from and after the date hereof as fully and entirely as the same would have been held and enjoyed by **Seller** had this Assignment not been made; and

SELLER HEREBY assigns and relinquishes to **Buyer** all of **Seller's** right, title and interest in and to all accrued and future causes of action for injunctive relief, damages, lost profits and litigation costs (including, without limitation, attorneys' fees) resulting from infringements or alleged infringements of the Intellectual Property and this Assignment expressly includes the right to sue for pre-assignment infringements and any injunctive relief, damages, lost profits and litigation costs (including, without limitation, attorneys' fees) in connection with the same; and

SELLER HEREBY further covenants and agrees that, from and after the date of this Assignment, **Seller** will not use or authorize the use (by license or otherwise) anywhere in the world of any of the Intellectual Property that is the subject of this Assignment; and

SELLER HEREBY further covenants and agrees that **Seller**, through its officers and employees, will, without further consideration, other than any and all reasonable, out-of-pocket expenses incurred by **Seller** for which Buyer shall be responsible, communicate with **Buyer**, its successors and assigns, any facts known to **Seller** and its officers and employees respecting the Intellectual Property and testify in any legal proceeding, sign all lawful papers when called upon to do so, execute and deliver all papers that may be necessary or desirable to perfect the title to the Intellectual Property in said **Buyer**, its successors and assigns; and

SELLER HEREBY acknowledges and agrees that the representations, warranties, covenants, agreements and indemnities set forth in the Asset Purchase Agreement are not modified, limited or superseded by this Assignment, and such representations, warranties, covenants, agreements and indemnities shall remain in force and effect to the full extent provided in the Asset Purchase Agreement.
