WHEREAS, I, **Joseph Gleason**, a resident of the state of Minnesota, (the "Inventor") have invented certain new and useful improvements in VARIABLE LORDOTIC ANGULAR EXPANDING IMPLANT WITH CENTRALIZED GRAFT DEPLOYMENT CHANNEL, for which an application for Letters Patent of the United States has been made, and which may be identified in the United States Patent Office by Application No. 16/984,005, filed August 3, 2020 (the "Invention").

WHEREAS, **Spineology Inc.** ("Assignee"), a business entity organized and existing under the laws of the State of Minnesota, and having its principal offices at 7800 3rd Street N, Suite 600, St. Paul, MN 55128, is desirous of acquiring the entire right, title and interest in and to said Invention, said applications and in, to and under any and all Letters Patents to be obtained therefor;

Inventor hereby authorizes the above mentioned Assignee, its successors and assigns, or anyone it may properly designate, to insert in this instrument the date of execution and/or filing date and application number of said application when ascertained.

Inventor further authorizes said Assignee, its successors and assigns, or anyone it may properly designate, to apply for Letters Patents, in its own name if desired, in the USA and any and all foreign countries, and additionally to claim the filing date of said United States application and/or otherwise take advantage of the provisions of the International Convention.

Upon said consideration Inventor does hereby covenant and agree with the said Assignee, its successors and assigns, that Inventor will not execute in writing or do any act whatsoever conflicting with these presents, and that Inventor or Inventor's executors or administrators will at any time upon request, without further or additional consideration, but at the expense of the said Assignee, its successors and assigns, execute such additional writings and do such additional acts as said Assignee, its successors and assigns, may deem necessary or desirable to perfect the Assignee's enjoyment of this grant, and render all necessary assistance in making application for and obtaining original, divisional, reissued or extended Letters Patent of the United States, or of any and all foreign countries on said invention, and in enforcing any rights occurring as a result of such applications or patents,
