This Patent Rights Assignment (this "Assignment") is made effective this 10th day of June, 2021, by and between Magic Wand Research, LLC, a company having its principal place of business at 2528 S. Rosewood Street, Philadelphia, PA 19145 ("Assignor") and NeuroDerm, Ltd., a company having its principal place of business at 3 Pekeris Street, Rabin Science Park, 7670212 Rehovot, Israel ("Assignee").

WHEREAS, Assignor possesses certain rights in and to U.S. Patent Application No. 17/334,554, filed on May 28, 2021 and entitled METHOD FOR TREATMENT OF PARKINSON'S DISEASE (and identified by Attorney Docket No. NEU-034) (the "Patent Rights") and the invention(s) claimed in the Patent Rights (the "Invention"); and

WHEREAS, Assignor now wishes to assign the Invention and Patent Rights to Assignee, and Assignee desires to acquire the Invention and Patent Rights from Assignor; and

NOW, THEREFORE, in consideration of the premises set forth above and in the Agreement and for other good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged:

Assignor does hereby sell, assign, convey and transfer unto Assignee and its successors, assigns, and legal representatives, Assignor's entire right, title and interest, which Assignee accepts, in and throughout the world in and to the Inventions, together with Assignor's entire right, title and interest, which Assignee accepts, in and to the Patent Rights and such other patents as may issue thereon or claim priority under United States law or international or foreign convention, including but not limited to non-provisionals, continuations, divisionals, continuations-in-part, reissues, reexaminations, extensions, and substitutions of patents and patent applications within the Patent Rights or such other patents, and the right to claim priority to the Patent Rights for any such application and patents, and any right, title and interest Assignor may have in invention(s) and applications to which the Patent Rights claim priority; the Inventions and the Patent Rights to be held and enjoyed by Assignee for its own use and behalf and for its successors, assigns and legal representatives, to the full end of the term for which said patents may be granted as fully and entirely as the same would have been held by Assignor had this assignment and sale not been made; and Assignor hereby conveys all of its rights arising under or pursuant to any and all United States laws and foreign and international agreements, treaties or laws relating to the protection of industrial property by filing any such applications for patent, including but not limited to any cause(s) of action and damages accruing prior to this assignment, including all rights to exclude others from practicing the claimed invention(s) and all rights to seek any and all remedies in law or equity, including damages and injunctive relief, for past, present, and future infringement. Assignor hereby acknowledges that this assignment, being of Assignor's entire right, title and interest in and to the Inventions and the Patent Rights carries with it the right in Assignee to apply for and obtain from competent authorities in all countries of the world any and all patents by attorneys and agents of Assignee's selection and the right to procure the grant of all patents to Assignee in its own name as assignee of Assignor's entire right, title and interest therein.

Assignor does hereby authorize the Director of the United States Patent & Trademark Office, and the empowered officials of all other governments whose duty it is to record patents, applications and title thereto, to record the Patent Rights and title thereto as the property of Assignee, its successors, assigns, or legal representatives in accordance with the terms of this instrument.
