UTILITY PATENT ASSIGNMENT

This assignment made on this 19th day of April, 2022, by Ron Elkins, of Aztec, NM, and Arthur Sullivan, of Bloomfield, NM (collectively the "Assignors"), to ELK-N-LIZARD, LLC, a New Mexico limited liability company, with an address of 32 Road 3179, Aztec, NM 87410 ("Assignee").

WHEREAS, Assignors are the inventors and owners of U.S. Patent No. 11,306,567, entitled, "Ball Lift Sleeve and Retrieval Tool for Oil and Gas Wells," issued on April 19, 2022 (the "Patent").

WHEREAS, Assignee desires to acquire by formal, recordable assignment Assignors' entire right, title, and interest in and to said Patent and any resulting utilities, reissues, or extensions that may be granted.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignors assigns to Assignee the entirety of his right, title, and interest in the invention and Patent (as well as such rights in any utilities, divisions, continuations in whole or part, or substitute applications) to Assignee for the entire term of the Patent and any utilities, reissues, or extensions that may be filed and granted and for the entire terms of any and all foreign patents that may issue from foreign applications (as well as divisionals, continuations in whole or part, or substitute applications) filed claiming the benefit of the Patent.

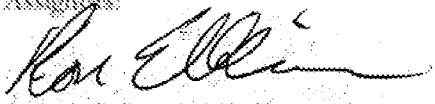

Assignors represent and warrant that they have not granted and will not grant to others any rights inconsistent with the rights granted herein. Assignors authorize and request the Commissioner of Patents and Trademarks of the United States and of all foreign countries to issue any patents resulting from the Patent to Assignee according to this Agreement. The right, title, and interest are to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as it would have been held and enjoyed by Assignors had this assignment not been made.

Assignors further agree to: (a) cooperate with Assignee in the prosecution of any patent applications resulting from the invention and/or Patent and foreign counterparts; (b) execute, verify, acknowledge, and deliver all such further papers, including patent applications and instruments of transfer; and (c) perform such other acts as Assignee lawfully may request to obtain or maintain the Patent for the invention in any and all countries.
