and all nonprovisional, divisional, continuation and continuation-in-part applications thereof, all reissues, reexaminations and extensions thereof, including all rights of priority arising from said applications, and all the rights and privileges in said applications and under any and all patents, patent applications, patent rights, and inventor's certificates thereof that may be granted in the United States for said inventions; and I also concurrently hereby sell, assign and transfer to Digerati, Inc., the entire right, title and interest in and to said inventions and all patents, patent applications, patent rights, and inventor's certificates thereof for all countries foreign to the United States and for all other authorities, organizations or entities, including all rights of priority arising from the applications aforesaid, and all the rights and privileges under any and all forms of protection, including Letters Patent, that may be granted in said countries foreign to the United States for said inventions; and with all of these rights, title and interest to be held and enjoyed by Digerati, Inc. as fully and completely as the same would have been held by me had this assignment not been made, and the right to sue for, and recover for past infringements of, or liabilities for, any of the rights relating to any of the application, patents, utility models, or other similar rights resulting therefrom.

I authorize Digerati, Inc. to make application for such protection in its own name and maintain such protection in the United States and any and all countries foreign to the United States and all other authorities, organizations or entities, and to invoke and claim for any applications for patent or other form of protection for said inventions, without further authorization from me, any and all benefits, including the right of priority provided by any and all treaties, conventions, or agreements.
