PATENT ASSIGNMENT

Avigilon Corporation, a Canadian corporation ("Assignor") hereby executes this **PATENT ASSIGNMENT** (this "Assignment") effective as of January 1, 2022 (the "Effective Date") in favor of **Motorola Solutions, Inc.**, a Delaware corporation ("Assignee") to evidence the transfer of all rights, title, and interest in certain patents and patent rights from Assignor to Assignee in connection with the Intellectual Property Transfer and Assignment Agreement effective as of the Effective Date between Assignor and Assignee (the "Agreement"). Assignor and Assignee are each a "Party" and collectively the "Parties".

1. For good and valuable consideration, receipt of which Assignor acknowledges, Assignor hereby assigns and transfers to Assignee all of Assignor's right, title and interest in the following:

(a) the patents and patent applications anywhere in the world owned by Assignor as of the Effective Date, including but not limited to those patent and patent applications specifically listed in Annex A to this Assignment (collectively, the "Assigned Patents");

(b) the inventions disclosed in and other subject matter covered by the Assigned Patents, together with the right to file applications and obtain patents for said inventions and subject matter in Assignee's own name throughout the world; and

(c) the following properties and rights with respect to the Assigned Patents:

(i) any patents in the United States and anywhere else in the world that may be granted on any patent application listed in Annex A and any patent applications that may be filed, and any patent that may be granted on any such patent application, with respect to the Assigned Patents or the inventions disclosed therein or subject matter covered thereby (together with the Assigned Patents, the "Assigned Patent Rights");

(ii) all divisions, renewals, reissues, continuations, extensions, substitutions and continuations-in-part of the Assigned Patents or Assigned Patent Rights and any national and international counterparts thereof;

(iii) any right of priority related to any of the Assigned Patent Rights;

(iv) the right to sue and recover damages and payments for past, present, and future infringements of any of the Assigned Patents or Assigned Patent Rights; and

(v) all rights under the International Convention for the Protection of Industrial Property which relate in any way to the Assigned Patents.

2. Assignor agrees to do the following, when requested by Assignee, and without further consideration, in order to carry out the intent of this Assignment: (a) execute all oaths, assignments, powers of attorney, applications, and other papers necessary or desirable to fully secure to Assignee the title and interest herein conveyed, and (b) generally do all lawful acts that Assignee shall consider desirable for securing, maintaining, and enforcing worldwide protection relating to the Assigned Patent Rights and for vesting in Assignee the title and interest herein conveyed.

3. Assignor hereby requests that (i) any applicable governmental entity or registrar (including any applicable foreign or international office or registrar), record Assignee as the assignee and legal owner of the Assigned Patent Rights and (ii) the Commissioner of Patents issue to Assignee any and

all Letters Patent of the United States arising from such Assigned Patent Rights for the use and behalf of Assignee, its successors, legal representatives, and assigns.

4. Assignor grants Assignee the power to insert on this Assignment any further identification that may be necessary or desirable in order to comply with the rules of the United States Patent and Trademark Office or other authority for recordation of this document.

5. This Assignment and all the provisions hereof shall be binding upon and shall inure to the benefit of the parties and their respective successors and permitted assigns.

6. The Parties may execute this Assignment in multiple counterparts, each of which constitutes an original instrument, and all of which together constitute one agreement. The signatures of both Parties need not appear on the same counterpart. The delivery of signed counterparts by facsimile or email transmission that includes a copy of the sending Party's signature is as effective as signing and delivering the counterpart in person.

7. This Assignment is executed pursuant to the Agreement, to which reference is made for a further statement of the rights and obligations of Assignor and Assignee with respect to the Assigned Patent Rights. Nothing contained in this Assignment shall be deemed to modify, supersede, enlarge, or affect the rights of any party to the Agreement. The Agreement shall control if any provision of this Assignment is inconsistent or conflicts with the Agreement.

8. The laws of the State of Delaware, U.S.A. (without reference to its principles of conflicts of law) govern the construction, interpretation and other matters arising out of or in connection with this Assignment.

The Parties have caused this Assignment to be executed by their duly authorized representatives effective as of the Effective Date.
