## ASSIGNMENT

This Assignment is made by and between:

- Tonny Konstrmann (the "Inventor") and Lachenmeier ApS, which has a place of business at Fynsgade 6-10, 6400-Sonderborg, Denmark ("Lachenmeier"), individually and collectively as Assignors; and
- Signode Industrial Group LLC, which has a place of business at 3650 West Lake Avenue, Glenview, Illinois 60026, U.S.A. ("Signode"), as Assignee.

Whereas, Lachenmeier is an affiliate of Signode.

Whereas, United States Patent Application No. 63/024,593, filed on May 14, 2020 and entitled "Stretch-Hood Machine" (the "Patent Application"), describes one or more inventions (the "Inventions").

Whereas, the Inventor made the Inventions for which the Patent Application was filed.

Whereas, Lachenmeier employed the Inventor in a technical capacity at least upon conception of the Inventions.

Whereas, Assignors and Assignee have at all times desired that Assignee shall absolutely hold any and all rights in and to the Inventions, the Patent Application, and all related patent applications.

Now therefore, for valuable and sufficient consideration from Assignee to Assignors, receipt of such consideration is hereby acknowledged and intending to be legally sufficient, Assignors hereby sell, assign, and convey to Assignee, its successors, and its assigns (or hereby confirm a prior sale, assignment, and conveyance to Assignee, its successors, and its assigns of) the entire right, title, and interest of Assignors in and to the Inventions and the Patent Application, including (but not limited to) the entire right, title, and interest of Assignors:

- (1) in and to all patent applications on the Inventions and/or that claim priority to the Patent Application that have already been or are hereafter filed (and any patents that issue therefrom) in any jurisdiction, including any divisional, continuation, continuation-in-part, substitution, reexamination, and reissue applications (and legal equivalents thereof);

- (2) in and to any priority rights and any other application and patent rights in those patent applications and patents; and
- (3) in and to any rights to sue for any past, present, or future infringement of any patents issuing from the Patent Application and any other patent applications in any jurisdiction on the Inventions, including (but not limited to) the right to collect and receive any damages, royalties, or settlements for such infringements; any rights to sue for injunctive or other equitable relief; and any causes of action relating to any patents issuing from any the Patent Application or any other patent applications on the Inventions.

If the jurisdiction, serial number, and/or filing date of the Patent Application is/are not indicated above, Assignors authorize Assignee (or its agent or attorney) to enter the jurisdiction, serial number, and/or filing date of the Patent Application in the spaces provided above.

Assignors confirm that Assignee had the right to file the Patent Application and shall have the right to file additional patent applications on the Inventions in any jurisdiction.

Assignors agree that the Patent Application and any other patent applications that may be filed on the Inventions under any applicable international treaties or conventions may be filed in the Assignee's name with the right to claim priority to the Patent Application.

Assignors authorize the appropriate government officials to issue to Assignee any patents granted on the Patent Application and/or other patent applications on the Inventions.

Assignors agree that Assignors shall, upon demand of Assignee, its successors, or its assigns and without further consideration to Assignors, fully cooperate with Assignee in preparing, filing, and procuring any patent applications on the Inventions in any jurisdiction.

Assignors agree that Assignors shall, upon demand of Assignee, its successors, or its assigns and without further consideration to Assignors, execute and deliver any papers, make all rightful oaths, and perform all acts that may be reasonably necessary (or deemed by Assignee, its successors, or its assigns to be reasonably necessary) to fulfill the intent and purpose of this Assignment.

Assignors agree that Assignors shall, upon demand of Assignee, its successors, or its assigns and without further consideration to Assignors, provide any information, testify in any legal proceeding, and take any other actions that may be reasonably necessary (or deemed by Assignee, its successors, or its assigns to be reasonably necessary) to Assignee's, its successors', or its assigns' full enjoyment, protection, enforcement, and title in and to the Inventions and any rights hereby transferred.

Assignee can assign any rights Assignee takes under this Assignment without restriction.

Assignors confirm Assignors' absolute assignment to Assignee of any rights Assignors may have in the Inventions and the Patent Application to the full extent that Assignors would have had had this Assignment not been made.

The consideration for the Assignment is enumerated above. In deference to those jurisdictions in which monetary consideration is required to effect an assignment, Assignee agrees to pay each Assignor \$1 or another sufficient amount as agreed to by the parties, the receipt, adequacy, and sufficiency of which Assignors acknowledge on signature hereto.
