ASSIGNMENT

WHEREAS, we **Michael J. Seiver, Louis E. Bruce, Thomas P. Reichelt and Michael I. Alshan** have invented certain new and useful methods, devices, and systems relating to manipulating a drum or other container (collectively, the "Inventions") for which a United States regular utility patent application entitled "**APPARATUS, SYSTEMS AND METHODS FOR MANIPULATING A DRUM OR OTHER CONTAINER**" was filed under attorney docket number 2304.029 on November 14, 2018 and assigned Serial Number 16/190,647 (the "Application"); and

WHEREAS, **Specialty Equipment Fabrication Company**, a Texas corporation, having its principal place of business located at 1221 Adkins Road, Houston, Texas 77055 ("SEFCO"), is desirous of acquiring the entire right, title and interest in and to the aforesaid Inventions and Application, including the right to file additional patent applications in the United States and patent applications outside the United States (which shall include filings under the provisions of any convention or treaty);

NOW, THEREFORE, for and in consideration of the sum of Ten Dollars (\$10.00) and for other good and valuable consideration, the receipt of which is hereby acknowledged, I hereby sell, assign, transfer and set over to **SEFCO**, all right, title and interest in and to said Inventions throughout the world, and said Application, and any and all other provisional applications and regular U.S. and foreign patent applications relating to the Application or Inventions and any and all divisions, continuations, continuations-in-part and other patent applications relating or claiming priority thereto and reissues thereof, all such applications and the Application being collectively referred to herein as the "Applications", and any and all patents of the United States and foreign countries which may be granted on the Applications, the same to be held and enjoyed by **SEFCO** for its own use and benefit, and for the use and benefit of its successors, assigns, or other legal representatives, to the end of the term or terms for which said patents of the United States or foreign countries are or may be granted or reissued, as fully and entirely as the same would have been held and enjoyed by me if this assignment and sale had not been made.

And I hereby authorize and request the Commissioner of Patents and Trademarks and other authorities in foreign countries to issue any and all patents on said Inventions or resulting from said Applications to **SEFCO**, as assignee of my entire interest, and hereby covenant that I have the full right to convey the entire interest herein assigned, and that I have not executed and will not execute any agreement in conflict herewith.

And I further hereby covenant and agree that I will, at any time, upon request, execute and deliver any and all papers that may be necessary or desirable to perfect the title of said Inventions, Applications and patents as may be granted therefor, to **SEFCO**, its successors, assigns, or other legal representatives and that if **SEFCO**, its successors, assigns or other legal representatives shall desire to file any regular, divisional, continuation, continuation-in-part applications or other patent applications based upon the Application, secure a reissue of such

patent(s) or to file a disclaimer relating thereto, I will upon request, sign all papers, make all rightful oaths and do all lawful acts requisite for the filing and procuring thereof without further compensation but at the expense of said assignee, its successors or other legal representatives.

And I do further covenant and agree that I will, at any time upon request, communicate to **SEFCO**, its successors, assigns or other legal representatives, such facts relating to said Inventions, Applications and patents and the file histories thereof as may be known to me, and testify as to the same in any interference or other administrative proceeding or litigation when requested so to do, without further compensation but at the expense of said assignee, its successors, or other legal representatives.
