Share Option

Ube Industries, Ltd. stock compensation type share options 2021 Number of share options

432 shares

Classes of shares underlying share options, and number of shares per class, and calculation method thereof

The classes of shares underlying share options shall be the Company's common shares, and the number of shares underlying each share option ("Number of Granted Shares") shall be 100 shares. However, applicable on or after the date of such resolution, in the event of share split of the Company's common shares (including allotment of the Company's common shares without contribution; the same applies to the descriptions about share split hereinafter), or in the event of share consolidation, the Number of Granted Shares shall be adjusted using the calculation formula below, and a resulting fraction less than 1 share shall be rounded off

Number of Granted Shares after adjustment =

Number of Granted Shares before adjustment \times Share split or share consolidation ratio

In the case of share split, the Number of Granted Shares after adjustment shall be applicable on or after the next day of the record date for such share split (if no record date is provided for, then the effective date thereof), and in the case of share consolidation, the Number of Granted Shares after adjustment shall be applicable on or after the effective date thereof. However, in the event of share split that is premised on the approval, in a general shareholders' meeting, of the item on agenda providing that the amount of surplus shall be decreased to increase the stated capital or reserves, and if a date that is prior to the date of conclusion of the general shareholders' meeting is to be the record date for share split, then the Number of Granted Shares after adjustment shall be applicable on or after the next day of the date of conclusion of such general shareholders' meeting, retroactive to the next day of such record date.

Furthermore, in the event of the Company's merger or spin-off to take place on or after the date of this resolution, or if it becomes necessary to otherwise adjust the Number of Granted Shares accordingly, the Company may make adjustment to the Number of granted Shares appropriately within a reasonable scope. In the event of making adjustment to the Number of Granted Shares, the Company will, by the previous day of the day on which the Number of Granted Shares after adjustment shall be applicable, notify the holder of each share option, as indicated on the share option register, of the necessary information ("Share Option Holder"), or make such announcement. However, if notification or announcement cannot be made by the previous day of the day of said application, notification or announcement shall be made promptly thereafter.

Amount of payment for share option for subscription, or calculation method thereof, or the need for no payment

Reference No. Hi-817321

* Underlined parts refer to deleted items.

The amount of payment for each share option for subscription shall be the amount obtained by using the following formula of the Black-Sholes model to calculate the option price per share, based on the basic numerical values of (2) to (7) shown below, and multiplying the option price per share with the Number of Granted Shares (any fraction less than 1 shall be rounded up or down to the nearest integer).

$$-qT -rT$$

$$C = Se N(d)-Xe N(d-\sigma\sqrt{T})$$

In this case,

$$d = \frac{\text{In}(S/X) + (r-q+\sigma^2/2)T}{\sigma\sqrt{T}}$$

- (1) Option price per share (C)
- (2) Share price (S): Closing price for shares of the Company's common stock in ordinary trading at the Tokyo Stock Exchange as of July 14, 2021 (if there is no closing price, the standard price on the immediately following trading day)
- (3) Exercise price (X): 1 yen
- (4) Estimated time to maturity (T): 4 years
- (5) Volatility (σ): The volatility rate of share price, calculated based on the closing price for shares of the Company's common stock in ordinary trading on the last trading day of each month during a four-year period (from July 2017 until June 2021)
- (6) Risk-free interest rate (r): The interest rate on Japanese government bonds for which the number of years to maturity corresponds to the estimated time to maturity
- (7) Dividend yield (q): Dividend per share (the amount of actual dividends in the fiscal year ending on March 31, 2021) / Share price specified in (2) above)
- (8) Cumulative distribution function of the standard normal distribution $(N(\cdot))$

Value of the properties to be contributed for the exercise of share options, or the calculation method thereof

The value of the properties to be contributed for the exercise of share options shall be the amount obtained by multiplying 1 yen, which is the amount of payment per share that can be issued upon exercising each of the share options ("Exercise Price"), with the Number of Granted Shares.

Period during which share options can be exercised

From July 15, 2021 until July 14, 2046

Conditions for the exercise of share options by the Company

- (1) Share Option Holder shall be able to exercise share options on or after the next day of the day on which the person loses his or her position as the Company's director or executive officer.
- (2) The conditions of the above (1) do not apply to a person who succeeds share options by inheritance.
- (3) If Share Option Holder renounces his or her share options, the Share Option Holder shall not be able to exercise such share options.
