## PATENT ASSIGNMENT

THIS PATENT ASSIGNMENT (this "Assignment") is made and entered into as of May 24, 2021, by and among CONSENSUS ORTHOPEDICS, INC., a California corporation ("Assignor"), and SHALBY ADVANCED TECHNOLOGIES, INC., a Delaware corporation ("Assignee"). Assignor and Assignee are referred to herein individually as "Party" and collectively as "Parties".

WHEREAS, Assignor and Assignee are Parties to that certain Asset Purchase Agreement (the "Purchase Agreement"); and

WHEREAS, pursuant to the Purchase Agreement, Assignee acquired all rights in and to the patents and patent applications identified on Exhibit A, attached hereto and incorporated by this reference (the "Patents"); and

WHEREAS, the Parties desire to enter into this Assignment to effect the purposes contemplated by the Purchase Agreement, assign the Patents from Assignor to Assignee, and record such assignment with the United States Patent and Trademark Office and any relevant non-U.S. patent and trademark offices.

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, and intending to be legally bound hereby, Assignor agrees as follows:

1. Assignor hereby assigns, conveys, transfers and sets over absolutely to Assignee, all rights, title and interests in and to the Patents, for the United States and for all foreign countries, including any divisions, reissues, reexaminations, extensions or foreign equivalents thereof or continuations or continuations-in-part, and including the subject matter of all claims which may be obtained therefrom, and to any and all inventions and improvements which are disclosed, claimed or possessed by Assignor, including any and all inventions which are disclosed but not claimed, for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns or other legal representatives, as fully and entirely as the same would have been held and enjoyed by Assignor if this Assignment had not been made, together with all income, royalties, damages or payments due or payable as of the date hereof or thereafter, including without limitation, all claims for damages by reason of past, present or future infringement or other unauthorized use of the Patents, with the right to sue for, and collect the same for Assignee's own use and enjoyment, and for the use and enjoyment of Assignee's successors, assigns, or other legal representatives.

2. Assignor authorizes and requests the Commissioner of Patent and Trademarks (and any other non-U.S. patent issuing counterpart) to record Assignee as owner of the Patents, including any divisions, reissues, reexaminations or extensions thereof or continuations or continuations-in-part, and to issue any and all letters patent of the United States and any foreign jurisdiction thereon to Assignee, as assignee of the entire right, title and interest in, to and under the same, for the sole use and enjoyment of Assignee, its successors, assigns or other legal representatives.

3. Assignor represents and warrants that Assignor has not previously assigned to any third party any right, title or interest in and to any of the Patents with respect thereto. Assignor acknowledges that Assignor shall have no right to receive any royalty, fee or other share of income or revenue that may be received by Assignee from the use, sale, license, publication, distribution or any other transfer or exploitation of the Patents. Assignor represents that it has discontinued all use of the Patents from and after the date of Closing (as such term is defined in the Purchase Agreement).

4. Assignor hereby further agrees for itself and its executors and administrators to execute upon request any other lawful documents reasonably necessary to assign fully the Patents to Assignee, Assignee's successors, assigns and legal representatives at Assignee's expense and charges, including the execution of applications for patents in foreign countries, and the execution of substitution, reissue, divisional or continuation applications and preliminary or other statements and, upon Assignee's reasonable request and expense, the giving of testimony in any interference or other proceeding in which the Patents may be involved.

5. If any term, provision, covenant or condition of this Assignment, or the application thereof to any person, place or circumstance, shall be held by a court of competent jurisdiction to be invalid, unenforceable or void, the term, provision, the remainder of this Assignment and such term, provision, covenant or condition as applied to other persons, places and circumstances shall remain in full force and effect.

6. The terms of the Purchase Agreement are incorporated herein by this reference. This Assignment is executed and delivered in connection with the Purchase Agreement and shall not be interpreted or construed as varying in any respect the agreements, covenants, representations or warranties of the Parties contained therein. This Assignment may be amended, modified or supplemented only by a written agreement signed by Assignor and Assignee.

7. This Assignment is absolute, exclusive and irrevocable.

8. In the event of any dispute under this Assignment, this Assignment will be construed and enforced in accordance with the laws of the State of California, without regard to its conflict of law principles.

9. This Assignment may be executed in one or more counterparts, each of which will be deemed to be an original copy of this Assignment and all of which, when taken together, will be deemed to constitute one and the same agreement. The exchange of copies of this Assignment and of signature pages by facsimile, or by .pdf or similar imaging transmission, will constitute effective execution and delivery of this Assignment as to the parties and may be used in lieu of the original Assignment for all purposes. Signatures of the parties transmitted by facsimile, or by .pdf or similar imaging transmission, will be deemed to be their original signatures for any purpose whatsoever.
