ASSIGNMENT OF PATENT RIGHTS

This Assignment of Patent Rights (this "Assignment"), effective as of November 22, 2022 (the "Effective Date"), by and between ONEIDA, LLC, a Delaware limited liability company (the "Debtor"), and WHITE HORSE CAPITAL MANAGEMENT, LLC ("WH"), in its capacity as agent ("Agent") for the Lenders as defined in that certain Loan and Security Agreement, dated as of January 25, 2019 (as amended, modified or restated from time to time, the "Second Lien Loan Agreement") (hereinafter, the Agent and Debtor shall be collectively referred to as the "Assignors"), on the one hand, and FOODSERVICES BRAND GROUP, LLC (f/k/a COHG ACQUISITION, LLC), a Delaware limited liability company (the "Assignee"), on the other hand. Assignors and Assignee shall hereinafter be referred to collectively as the "Parties", and each individually as a "Party".

RECITALS:

A. Debtor, the Agent and other parties entered into the Second Lien Loan Agreement. Any and all documents and instruments made or given in connection with or to evidence or secure the Second Lien Loan Agreement are hereinafter collectively referred to as the "Second Lien Loan Documents";

B. Pursuant to the Second Lien Loan Agreement and other related Second Lien Loan Documents, WH holds second-priority perfected liens on all or substantially all of the personal property assets owned by the Designated Obligors (collectively, the "Collateral") to secure payment and satisfaction of WH's claims against Designated Obligors under the Second Lien Loan Documents;

C. Debtor is in continuing default of the Second Lien Loan Agreement and the other Second Lien Loan Documents;

D. Debtor acknowledges that as a result of various defaults under the Second Lien Loan Documents, WH is entitled to and may exercise its remedies under the Second Lien Loan Documents and applicable law, including exercise of remedies pursuant to Article 9 of the Uniform Commercial Code, as enacted in the applicable jurisdiction(s) (the "UCC"), and may convey (the "Sale") all of the Debtor's rights, titles, and interests, throughout the world, in and to certain of the Collateral (the "Surrendered Collateral");

E. Leading up to the Sale, the Debtor has been the owner of all rights, titles, and interests, throughout the world, in and to all of the patents and patent applications listed on Schedule A hereto (collectively, the "Patent Assets"), and all other rights, titles, and interests set forth hereinbelow;

F. The Patent Assets, and all other rights, titles, and interests set forth hereinbelow, constitute a portion of the Surrendered Collateral; and

G. In connection with the Sale, Assignors and Assignee have agreed to execute this Assignment, whereby, pursuant to the Sale and this Assignment, Assignee will acquire and will have acquired all of Assignors' respective rights, titles, and interests, throughout the world, that Assignors have or may have, or had or may have had, in and to all Patent Assets, all inventions and discoveries disclosed and claimed therein, and all other rights, titles, and interests set forth hereinbelow.

NOW, THEREFORE, in consideration of the mutual promises and covenants and agreements contained herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the Parties, intending to be legally bound, hereby agree as follows:

1. Assignors hereby irrevocably assign, transfer, convey, deliver, and quitclaim to Assignee, and Assignee hereby accepts, all of Assignors' respective rights, titles, and interests, throughout the world, that Assignors have or may have, or had or may have had, in and to the following (collectively, the "Assigned Patent Rights"): (a) all Patent Assets, and any and all patents issuing therefrom in the United States and in any foreign country(ies), including, without limitation, any and all reissues, reexaminations, registrations, revalidations, additions, supplementary protection certificates, certificates of correction, renewals, and extensions thereof or therefor; (b) all inventions and discoveries claimed or otherwise disclosed in the Patent Assets (collectively, the "Inventions"); (c) all patent applications, including, without limitation, utility patent applications, design patent applications, provisionals, non-provisionals, divisionals, continuations, continuations-in-part, substitutions, applications for industrial property protection, utility models, inventors' certificates, and industrial designs, which have been or may be filed in the United States, in any foreign country(ies), or internationally, for or in connection with, or that otherwise claim or may claim priority to or the benefit of, any of the Patent Assets and/or the Inventions, and all patents issuing therefrom in the United States and in any foreign country(ies), including, without limitation, any and all reissues, reexaminations, registrations, revalidations, additions, supplementary protection certificates, certificates of correction, renewals, and extensions thereof or therefor; (d) all rights to file, prosecute, receive and secure, exclusively and directly in the name of Assignee, each of the patent applications, patents, and other patent-related filings referenced in Sections 1(a) through 1(c) (inclusive) hereof, and to claim any benefits, priority rights or other rights to which any of the foregoing are or may be entitled, in each case under the patent laws of the United States, the patent laws of any foreign country(ies), the Paris Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, or any other international agreement, treaty, law or convention, or the domestic rules, laws, statutes or regulations of any country(ies); and (e) all of Assignors' respective other rights, titles, interests, privileges and protections of any kind or nature whatsoever, that, in each case, have accrued, are accruing, or may accrue under any of the foregoing pursuant to any applicable law, rule, statute, regulation, convention or treaty, and that, in each case, existed, exists, or may come into existence, anywhere in the world.
2. Assignors hereby irrevocably assign, transfer, convey, deliver, and quitclaim to Assignee, and Assignee hereby accepts, all of Assignors' respective rights, titles, and interests, throughout the world, that Assignors have or may have, or had or may have had, to sue or to bring any action or to assert any claim, whether at law or in equity, against any person(s) or entity(ies) with regard to any of the Assigned Patent Rights, including without limitation for past, present or future infringement, misappropriation, violation, or unauthorized use of any of the Assigned Patent Rights, to obtain injunctive relief, and to recover or collect royalties, damages, and profits, including without limitation for such past, present or future infringement, misappropriation, violation, or unauthorized use of any of the Assigned Patent Rights, in each case, anywhere in and throughout the world.
3. All Assigned Patent Rights are to be held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as they would have been held and enjoyed by the respective Assignors had this Assignment not been made. Assignors agree that they will do, and will cause to be done, all acts serving to ensure that the Assigned Patent Rights are held and enjoyed by Assignee and Assignee's successors and assigns as fully and exclusively as they would have been held and enjoyed by the respective Assignors had this Assignment not been made. Without limiting the generality of the foregoing, at the request of Assignee or its successors or assigns, Assignors shall: (a) execute and deliver, and cause to be executed and delivered, to Assignee all lawful documents (including, without limitation, any and all petitions, affidavits, declarations, oaths, assignments, affirmations of assignment, powers of attorney, deeds, bills of sale,

instruments of assumption, instruments of recordation, or other instruments, in form and in substance as requested by Assignee), and take all such other actions, as may be necessary or prudent to (i) effect, evidence, affirm, perfect, register, or record this Assignment, or the assignment to Assignee (or any of its successors or assigns) of any of the Assigned Patent Rights, (ii) prosecute, maintain, administrate, or enforce any of the Assigned Patent Rights, or (iii) effect the intent and purposes of this Assignment (including without limitation the implementation and recordation of the transactions as contemplated by this Assignment), in each case for the benefit of Assignee or any of its successors or assigns; (b) furnish to Assignee (and, as applicable, any of its successors or assigns) all facts relating to the Assigned Patent Rights and all file histories therefor, and all documents, information, photographs, models, samples, prototypes, physical exhibits, and other evidence establishing or otherwise pertaining to the conception and reduction to practice of any of the Assigned Patent Rights; and (c) fully cooperate with and otherwise assist Assignee (and, as applicable, any of its successors or assigns) in any proceedings relating to any such Assigned Patent Rights (including, without limitation, by providing any documents, testimony or other evidence in any such proceedings), whether before the United States Patent and Trademark Office, any foreign office, any governmental office or administrative agency, or any other legal entity or body whatsoever. Assignee, or its successors or assigns, shall bear all reasonable and necessary costs associated with the foregoing.

4. Debtor hereby irrevocably designates and appoints Assignee and its duly authorized officers and agents as its agents and attorneys in fact, coupled with an interest, to act for and on its behalf and in its stead to execute and file any documents and to do all other lawfully permitted acts to effect, evidence, affirm, perfect, register, or record Assignee's rights under this Assignment, with the same legal force and effect as if executed by the Debtor, or any of its successors, legal representatives or assigns. To that end, the Debtor hereby grants Assignee and its duly authorized representatives the power to insert on this Assignment any further identification which may be necessary or prudent in order to comply with the rules of the United States Patent and Trademark Office, any foreign office, any governmental office or administrative agency, or any other legal entity or body whatsoever, for recordation and enforcement of this Assignment.
5. Assignors hereby authorize and request the United States Commissioner for Patents, and all similarly situated foreign officials, to issue any and all patent(s) resulting from any and all patent application(s) (of, for, or otherwise pertaining to, any of the Assigned Patent Rights) to Assignee, pursuant to the terms of this Assignment.
6. Assignors hereby covenant, represent, and warrant that they have the full right and authority to assign, transfer, convey, deliver, and quitclaim to Assignee all rights, titles, and interests, throughout the world, that the respective Assignors have or may have, or had or may have had, in and to the Assigned Patent Rights, and that Assignors have not executed, and will not execute, any agreement(s) in conflict herewith. To the extent any of the Assigned Patent Rights may have been sold, assigned, transferred, conveyed, delivered, or quitclaimed to Assignee via another instrument, including without limitation any and all documents and instruments evidencing the Sale, this Assignment shall operate as an affirmation of such sale, assignment, transfer, conveyance, delivery, or quitclaim of all rights, titles, and/or interests, throughout the world, that the respective Assignors have or may have, or had or may have had, in and to the Assigned Patent Rights to Assignee.
7. This Assignment, and the rights, titles, interests, duties and obligations hereunder, are freely assignable by Assignee in whole or in part. The duties and obligations of Assignors under this Assignment may not be assigned, delegated or transferred without the prior written consent of Assignee. This Assignment shall inure to the benefit of Assignee and its successors, assigns and

other legal representatives, and shall be binding upon Assignors and their respective successors, assigns and other legal representatives.

8. This Assignment may be executed in one or more counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. The execution and delivery of counterparts of this Assignment, whether by facsimile or by scanned and emailed signatures or by original manual signature, and regardless of the variation in pagination or appearance, shall be binding upon the Parties executing this Assignment.

IN WITNESS WHEREOF, the Parties have caused this Assignment of Patent Rights to be executed by and through their respective duly authorized representatives as of the Effective Date.
