ASSIGNMENT

WHEREAS, **Eemax, Inc.**, a corporation of the State of Delaware having a place of business at 400 Captain Neville Drive, Waterbury, Connecticut, 06705 ("Assignor"), owns or owned an interest in the patent properties listed in attached **Schedule A** ("the Patent Properties"); and

WHEREAS, **Rheem Manufacturing Company**, a corporation of the State of Delaware having a place of business at 1100 Abernathy Road NE, Suite 1700, Atlanta, Georgia 30328 ("Assignee"), desires acquiring or has acquired Assignor's interest in the Patent Properties and any related patent applications and patents;

NOW, THEREFORE, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor by these presents does hereby sell, assign, and transfer, or by virtue of an agreement with Assignee has sold, assigned, and transferred, unto Assignee, its successors, legal representatives, and assigns, Assignor's entire right, title, and interest in and to the Patent Properties and the inventions disclosed therein, any U.S. or foreign patent applications on the inventions, any U.S. or foreign patent applications claiming priority to any of the Patent Properties, including any division, continuation, continuation-in-part, reexamination, reissue, extension, substitution, or renewal of any of the Patent Properties, any right to claim priority arising from or required for any of the Patent Properties under any applicable convention, treaty, statute, or regulation, any other right, privilege, or form of protection related to the inventions disclosed in the Patent Properties or any of the foregoing patent applications, and any U.S. or foreign patent granted from any of the foregoing patent applications, to the full end of the term of the patent, to be held and enjoyed by Assignee, its successors, legal representatives, and assigns as fully and entirely as it would have been held and enjoyed by Assignor;

AND, Assignor hereby authorizes Assignee to file any of the foregoing patent applications in the name of Assignee or its designee, and Assignor authorizes and requests the patent office of any country to issue any patent granted from any of the foregoing patent applications in the name of Assignee or its designee, and Assignor further authorizes Assignee to insert the serial number and filing date of the above-identified patent application into this Assignment if unknown upon execution of this Assignment;

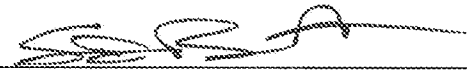

AND, Assignor does hereby sell, assign, transfer, and convey to Assignee, its successors, legal representatives, and assigns all claims for damages and all remedies arising out of any violation of the rights assigned hereby that may have accrued prior to the date of assignment to Assignee, or may accrue hereafter, including, but not limited to, the right to sue for, collect, and retain damages for past infringements of any of said patents before or after issuance;

AND, Assignor hereby warrants and covenants that Assignor has not and will not execute any assignment or other instrument in conflict with this Assignment;

AND, Assignor hereby covenants and agrees to do everything possible to aid Assignee, its successors, legal representatives, and assigns, to obtain, maintain, and enforce protection in the U.S. and foreign countries for the Patent Properties, and inventions, patent applications, and patents thereof, including signing lawful papers, executing patent applications, making assignments, rightful oaths, and declarations, and testifying in judicial or administrative proceedings.

IN WITNESS WHEREOF, the undersigned has caused this Assignment to be executed
by its duly authorized officers and its seal to be affixed, this 7th day of December, 2022.
