**PATENT AND INDUSTRIAL DESIGN ASSIGNMENT AGREEMENT**

This **Patent and Industrial Design Assignment Agreement** (“*Agreement*”), dated as of December 14, 2022, is made by and between WB Frozen US, LLC, a Delaware limited liability company (“*Assignor*”), and CV NE, LLC, a Delaware limited liability company (“*Assignee*”). Assignor and Assignee are referred to herein collectively as the “*Parties*” and individually as a “*Party*.”

**WHEREAS**, pursuant to that certain Asset Purchase Agreement, dated as the date hereof by and among Assignor, Assignee and CV RE, LLC, Assignor has agreed to sell and assign to Assignee the entire right, title, and interest in and to the patents, pending patent application and industrial design registrations identified on attached Exhibit A (collectively, the “*Patents*”).

**WHEREAS**, in order to effectuate Assignor’s assignment to Assignee of its entire rights, title and interests in and to the Patents, Assignor is executing this instrument of assignment.

**NOW, THEREFORE**, for good and valuable consideration, the sufficiency and receipt of which are hereby acknowledged, Assignor hereby assigns, transfers and conveys to Assignee, Assignor’s entire worldwide right, title and interest in and to the Patents, free and clear of liens or encumbrances, together with all continuations, divisions, reissues and extensions thereof and the inventions described and claimed therein, and the right to claim priority based on the filing date of the applications and patents under the International Convention for the Protection of Industrial Property, the Patent Cooperation Treaty, the European Patent Convention, and all other treaties of like purposes.

Together with Assignor’s right, title and interest in and to each of the Patents are all rights of any kind whatsoever of Assignor accruing under any of the foregoing provided by applicable law, including the rights to police, monitor and enforce said Patents against any and all past, current and future infringements, dilution, misappropriation, unlawful imitation, misuse or default (including, without limitation, the right to sue for and collect damages caused by any such actions) together with any and all further privileges in the United States, Canada, and throughout the world to establish use, ownership, and registration of the Patents, as well as all rights to receive all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the Patents, whether known or unknown, contingent or non-contingent.

Assignor agrees to perform all affirmative acts which may be necessary or desirable to record or perfect the above-described transfer of Patent rights, or to secure registration before the United States Patent and Trademark Office, the Canadian Intellectual Property Office, or any foreign Patent office, at Assignee’s expense, as well as to cooperate with Assignee in obtaining and/or providing information required in any proceedings relating to the Patents, again at Assignee’s expense.

Assignor further authorizes the Commissioner of Patents and Patents of the United States, and the appropriate official in Canada, or any other country, to transfer the Patents to Assignee, and Assignee’s successors and/or assigns.

Assignor hereby grants to the designated attorneys of Assignee, the authority and power to insert on this instrument, any further identification which may be necessary or desirable for purposes of recordation by the United States Patent and Trademark Office, the Canadian Intellectual Property Office, or the Patent Office of any other country throughout the world.

This Agreement shall be construed and enforced in accordance with, and all questions concerning the construction, validity, interpretation, inducement to enter and/or performance of this Agreement (whether related to breach of contract, tortious conduct or otherwise and whether now existing or hereafter arising) shall be governed by, the internal laws of the State of Delaware, without giving effect to any laws, rules or provisions (whether of the State of Delaware or any other jurisdiction) that would cause the application of the laws, rules or provisions of any jurisdiction other than the State of Delaware.

This Agreement may be executed in multiple counterparts, each of which shall be deemed an original and all of which together shall constitute one instrument. This Agreement may be executed through the exchange of portable document format .pdf email signature pages or other electronic means, which shall have the same legal effect as original signatures.
