PATENT AND DESIGN SECURITY AGREEMENT

This Patent and Design Security Agreement is made as of January 23, 2023 (the "Agreement"), by and between Evriholder Products, LLC ("Grantor"), and ALTER DOMUS (US) LLC, in its capacity as Administrative Agent for the Secured Parties (together with its successors and assigns in such capacity, "Grantee"). All capitalized terms used but not otherwise defined herein have the meanings given to them in the Pledge and Security Agreement (defined below).

WHEREAS, KEJ LLC, Evriholder Acquisition, Inc., Grantor and Grantee have entered into a Pledge and Security Agreement, dated January 23, 2023 (as amended, restated, amended and restated, supplemented, or otherwise modified from time to time, the "Pledge and Security Agreement"), pursuant to which Grantor has granted Grantee a security interest in the Collateral for the benefit of the Secured Parties; and

WHEREAS, Grantor is the owner of the issued patents and patent applications and design and design applications listed on the attached Schedule A, (the "Patents and Designs"); and

WHEREAS, Grantor and Grantee wish to enter this Patent and Design Security Agreement in conjunction with the security interest in the Collateral granted by Grantor to Grantee for the benefit of the Secured Parties under the Pledge and Security Agreement.

NOW, THEREFORE, in consideration of the mutual covenants and agreements set forth herein and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Grantor and Grantee hereby agree that:

1. Grantor hereby pledges and grants to Grantee for the benefit of the Secured Parties a continuing security interest in all of Grantor's right, title and interest in and to (a) the Patents and Designs, (b) all extensions, modifications and renewals thereof, (c) all goodwill of each Grantor's business symbolized by the foregoing or associated therewith, and (d) all of each Grantor's rights corresponding thereto throughout the world (collectively, the "Patent and Design Collateral") solely for the purpose of securing Grantor's payment, performance and observance of the Secured Obligations pursuant to and under the Pledge and Security Agreement. This Agreement is not to be construed as an assignment of any Patent and Design or Patent and Design application.
2. Grantor does hereby further acknowledge and affirm that the rights and remedies of the Grantee with respect to the Collateral (including the Patent and Design Collateral) are more fully set forth in the Pledge and Security Agreement, the terms and provisions of which are hereby incorporated herein by reference as if fully set forth herein. In the event of any conflict between the terms of this Patent and Design Security Agreement and the Pledge and Security Agreement, the terms of the Pledge and Security Agreement shall control.
3. Upon the Payment in Full of the Obligations (other than indemnity obligations under the Loan Documents that are not then due and payable or for which any events or claims that would give rise thereto are not pending), Grantee shall promptly execute, acknowledge and deliver to Grantor an instrument in writing in recordable form and reasonably acceptable to Grantor releasing

the security interest in the Patent and Design Collateral granted under this Patent and Design Security Agreement.

4. This Patent and Design Security Agreement may be executed in any number of counterparts and by different parties hereto in separate counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement. Delivery of an executed counterpart by facsimile or electronic mail shall be equally effective as delivery of an original executed counterpart.

5. This Agreement shall be construed in accordance with and governed by the laws of the State of New York.
