### AGREEMENT

NOW, THEREFORE, in consideration of the foregoing promises and other good and valuable consideration, and the covenants and agreements in this Agreement, the receipt of which is acknowledged, Assignors and Assignee agree as follows:

1. Assignors do hereby, transfer, convey, assign and deliver to Assignee all of Assignors’ right, privilege, title and interest in, to and under the Patents and in the case of patent applications in and to any patents that may issue therefrom, including, in all instances, any counterparts of any of the foregoing in any jurisdiction throughout the world, and any and all divisions, continuations, reissues or reexaminations of any of the foregoing (all of the foregoing shall also be deemed included in the definition of Patents), including all damage claims for past infringement, all related claims for information, including on the sources and distribution channels of infringing products, claims for rendering of accounts, and claims for destruction of infringing goods and reasonable compensation (hereinafter “**Damages**”) now or hereafter due or payable with respect thereto, and all causes of action (whether in law or equity) by reason of past, present and future infringements of the Patents, along with the right to sue for, counterclaim, recover and collect such Damages for the use and benefit of Assignee and its successors, assigns and other legal representatives. Assignee hereby accepts this assignment.
2. Insofar as this assignment concerns European patents and patent applications, Assignors hereby agree that the Assignee shall record in the register with the European Patent Office and/or national patent offices; and Assignee hereby declares that Assignee has agreed to the assignment of the aforementioned Patents to it.
3. Assignors hereby authorize and request the Commissioner for Patents of the United States, and any officer of any country or countries foreign to the United States, whose duty it is to issue patents or other evidence or forms of intellectual property protection or applications as aforesaid, to issue the same to Assignee and its successors, assigns and other legal representatives in accordance

5. Assignors authorize and empower Assignee, its successors, assigns and legal representatives or nominees, to invoke and claim for any application for patent or other form of protection for the inventions underlying the Patents, the benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it, or any other international agreement or the domestic laws of the country in which any such application is filed, as may be applicable, and to invoke and claim such right of priority without further written or oral authorization from Assignors.

6. In accordance with the License Agreement, Assignors subrogate the Assignee, as of the signature of this Agreement, in all their rights and actions pertaining to the Patents. Assignee shall be entitled, consequently: (i) to use and dispose of the Patents as its own property; and (ii) to take and continue any legal action pertaining to the assigned Patents, notably for infringement, and to be awarded damages including for facts that occurred prior to this assignment.

7. Assignors hereby consent that a copy of this Agreement shall be deemed a full legal and formal equivalent of any assignment, consent to file or like document that may be required in any country for any purpose and more particularly in proof of the right of Assignee or nominee to claim the aforesaid benefit of the right of priority provided by the International Convention for the Protection of Industrial Property, as amended, or by any convention which may henceforth be substituted for it.
