WHEREAS, the Assignee desires to acquire the entire right, title and interest in the Inventions, and in any Patents obtained therefore and thereon;

NOW, for good and valuable consideration received from the Assignee, receipt and sufficiency of which is hereby acknowledged, the Assignor assigns and transfers to the Assignee, the Assignor's entire right, title and interest in the Inventions, and all United States Patents which may be granted on the Inventions, and all reissues, reexaminations and extensions on the Inventions, and all priority rights under all available International Agreements, Treaties and Conventions in every participating country, and all applications for patents (including related rights such as utility-model registrations, inventor's certificates, and the like) filed for the Inventions in any foreign countries, and all patents granted for the Inventions in any foreign countries, and all reissues, reexaminations and extensions on the Inventions in any foreign country; the Assignor assigns and transfers to the Assignee the right to file applications on the Inventions in the United States and all foreign countries, and the Assignor authorizes and requests the United States Commissioner of Patents and Trademarks, and any officials of foreign countries whose duty it is to issue patents, to issue all patents for the Inventions to the Assignee in accordance with the terms of this Assignment;

AND, for the same consideration, the Assignor covenants that when requested, without charge to, but at the expense of the Assignee, to carry out in good faith the intent and purpose of this Assignment; the Assignor will disclose, or cause to be disclosed, all facts known to the Assignor relating to the Inventions and their histories; the Assignor will testify in all legal
