ASSIGNMENT

Whereas, Kareemullah Shaik, Andrew Edmonds, Ryan Nicholl, and David Pain, the undersigned Inventor(s) has/have made certain inventions, improvements, and discoveries (herein referred to as the "Invention") in:

Title of the Invention: ELECTROCHEMICAL-DEPOSITION APPARATUSES AND ASSOCIATED METHODS OF ELECTROPLATING A TARGET ELECTRODE

and further identified by the Docket Number provided above in the header of this Assignment, for which an application for a United States Patent was executed concurrently herewith or was filed on May 6, 2022 having U.S. Patent Application No. 17/738,729

Whereas, FABRIC8LABS, INC., a corporation of Delaware having a place of business at 10788 Ferris Square Suite 101, San Diego, CA 92121, (herein referred to as FABRIC8LABS, INC.), desires to acquire, and each undersigned Inventor desires to grant to FABRIC8LABS, INC., the entire worldwide right, title, and interest in and to the Invention and in and to any and all patent applications and patents directed thereto;

Now, therefore, for good and valuable consideration, the receipt and sufficiency thereof being hereby acknowledged, each undersigned Inventor hereby sells, assigns, and otherwise transfers to FABRIC8LABS, INC., its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the Invention, the above-identified United States patent application, and any and all other patent applications and patents for the Invention which may be applied for or granted therefore in the United States and in all foreign countries and jurisdictions, including all divisions, continuations, continuations-in-part, reissues, reexaminations, renewals, extensions, counterparts, substitutes, and extensions thereof, and all rights of priority resulting from the filing of such applications and granting of such patents. In addition, each undersigned Inventor hereby authorizes and requests the Director of the United States Patent and Trademark Office to issue any United States Patent, and foreign patent authorities to issue any foreign patent, granted for the Invention, to FABRIC8LABS, INC., its successors, legal representatives, and assigns, the entire worldwide right, title, and interest in and to the same to be held and enjoyed by FABRIC8LABS, INC., its successors, legal representatives, and assigns to the full end of the terms for which any and all such patents may be granted, as fully and entirely as would have been held and enjoyed by the undersigned had this Assignment not been made; and each undersigned Inventor agrees to execute any and all documents and instruments and perform all lawful acts reasonably related to recording this Assignment or perfecting title to the Invention and all related patents and applications, in FABRIC8LABS, INC., its successors, legal representatives, and assigns, whenever requested by FABRIC8LABS, INC., its successors, legal representatives, or assigns.

Each undersigned Inventor acknowledges their prior and ongoing obligations to sell, assign, and transfer the rights under this Assignment to FABRIC8LABS, INC. and is unaware of any reason why they may not have the full and unencumbered right to sell, assign, and transfer the rights hereby sold, assigned, and transferred, and has not executed, and will not execute, any document or instrument in conflict herewith. Each undersigned Inventor also hereby grants FABRIC8LABS, INC., its successors, legal representatives, and assigns, the right to insert in this Assignment any further identification (including, but not limited to, patent Application Number) which may be necessary or desirable for recordation of this Assignment. This Assignment is governed by the substantive laws of the State of California and any disputes will be resolved in a California state court or federal court sited in California.

[Inventor Signature Page(s) Follows]

The undersigned hereby authorize the patent practitioners filing the U.S. Patent Application referenced herein to add the application serial number and/or filing date to this assignment document.
