**NOW, THEREFORE**, in consideration of the premises and the mutual covenants and agreements hereinafter set forth, each Grantor and the Agent agree as follows:

### 1 Grant of Security

Each Grantor hereby grants to the Agent for the benefit of the Lenders (as defined in the Credit Agreement) a security interest in and to all of such Grantor's right, title and interest in and to its Patents and Trademarks (each as defined below), whether or not such interest is joint or in common with one or more third parties or another Grantor, including the following (the **Collateral**):

- (a) all present and future United States of America and foreign patents, design patents and certificates of invention that may be developed or acquired by or on behalf of such Grantor, or similar industrial property rights, and applications for any of the foregoing, including, but not limited to, the patents set forth in Schedule A hereto opposite the name of such Grantor, as Schedule A may be supplemented from time to time by supplements to the Security and this Agreement which shall be executed and delivered by such Grantor to the Agent from time to time, and all reissues, divisions, continuations, continuations-in-part, renewals, extensions and reexaminations thereof and amendments thereto (the **Patents**);
- (b) all present and future United States of America and foreign trademarks, trade names, corporate names, company names, business names, fictitious business names, internet domain names, service marks, certification marks, collective marks, logos, other source or business identifiers, designs and general intangibles of a like nature, all registrations and applications for any of the foregoing including, but not limited to, the trademark and service mark registrations, applications, and licenses set forth in Schedule B hereto

opposite the name of such Grantor, as Schedule B may be supplemented from time to time by supplements to the Security and this Agreement which shall be executed and delivered by such Grantor to the Agent from time to time, together with the goodwill connected with the use thereof and symbolized thereby and all extensions and renewals thereof (the **Trademarks**);

- (c) all rights of any kind whatsoever of such Grantor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions and otherwise throughout the world;
- (d) any and all royalties, fees, income, payments and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and
- (e) any and all claims and causes of action with respect to any of the foregoing, whether occurring before, on or after the date hereof, including all rights to and claims for damages, restitution and injunctive and other legal and equitable relief for past, present and future infringement, dilution, misappropriation, violation, misuse, breach or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

## **2 Security for Obligations**

This Agreement secures, and the Collateral is collateral security for, with respect to each Grantor, the prompt and complete payment and performance in full when due, whether at stated maturity, by required prepayment, declaration, acceleration, demand or otherwise of the Obligations (as such term is defined in the Credit Agreement).

## **3 Scope of Security Interest**

To the extent that the creation of the security interest would result in the termination of any agreement, licence or permit of the Grantors or to the extent any such Patent or Trademark would otherwise constitute Excluded Collateral (as defined in the Credit Agreement) (each, a **Restricted Asset**), the security interest will not attach to the Restricted Asset for so long as it remains the Restricted Asset. Notwithstanding anything in this Section 3 to the contrary, each Grantor shall grant to the Agent a security interest in any Collateral that ceases to be a Restricted Asset as a result of obtaining the consent of the other party or otherwise.

## **4 Recordation**

Each Grantor authorizes and agrees that it will, at its own expense, cause this Agreement, and any supplements or amendments thereto, to be recorded at the United States Trademark and Patent Office (and any successor office and any similar office in any United States state). Each Grantor authorizes the United States Commissioner for Patents, the United States Commissioner for Trademarks and any other government officials to record and register this Agreement.

## **5 Supplemental Security**

This Agreement is in addition to and without prejudice to all other security now held or which may hereafter be held by the Agent.

## **6 Execution in Counterparts**

This Agreement may be executed in any number of counterparts, each of which when so executed shall be deemed to be an original and all of which taken together shall constitute one and the same agreement.

**7 Grants, Rights and Remedies**

This Agreement has been entered into in conjunction with the provisions of the Credit Agreement. Each Grantor does hereby acknowledge and confirm that the grant of the security interest hereunder to, and the rights and remedies of, the Agent with respect to the Collateral are more fully set forth in the Credit Agreement, the terms and provisions of which are incorporated herein by reference as if fully set forth herein.

**8 Governing Law**

This Agreement shall be governed by, and construed in accordance with, the laws of the State of New York, without regard to conflict of laws principles.
