CONFIRMATORY PATENT ASSIGNMENT

This CONFIRMATORY PATENT ASSIGNMENT is made on April 21, 2023, by and between VisOptical, LLC, a Missouri limited liability company having an address of 8061 Clayton Road, Clayton, Missouri 63105 ("Assignor"), and Gary DiSalvo, an individual residing at 16412 Sheffield View Court, Wildwood, Missouri 63021 ("Assignee").

A. Assignee and Assignor entered into a purchase agreement memorialized in a Bill of Sale effective as of December 18, 2022, providing, subject to the terms and conditions set forth therein, for the sale, transfer, assignment, conveyance and delivery by Assignor to Assignee of all of Assignor's right, title and interest in and to the purchased assets and the assumption by Assignee of the assumed liabilities.

B. In accordance with the Bill of Sale, Assignor transferred and assigned to Assignee, and Assignee accepted the transfer and assignment of all of the registered patents in the United States or any foreign country relating to the purchased assets and any patent applications, pending or expired, relating to the purchased assets filed by Assignor (collectively, the "Patents").

C. Assignor represents and warrants that it formerly owned the Patents listed within Schedule A, and pursuant to the Bill of Sale, Assignor transferred and assigned to Assignee all of Assignor's right, title and interest in and to the Patents listed within Schedule A including:

- (i) the inventions claimed or described in the Patents;
- (ii) any patents in the United States and anywhere else in the world and patent applications that have been or may be granted or filed, respectively, with respect to those inventions, including, without limitation, all foreign patents that may claim priority based on or correspond to the Patents;
- (iii) all divisions, renewals, reissues, continuations, extensions and continuations-in-part of the foregoing patents and counterparts thereof throughout the world that may be based on or correspond to the Patents;
- (iv) all income, royalties, damages and payments due or payable to Assignor with respect to the patents, including, without limitation, unpaid damages and payments for past, present and future infringements of the Patents; and
- (v) all rights to sue and recover damages and payments for past, present and future infringements of any of the Patents.

D. Assignee and Assignor wish to confirm that Assignee has acquired all right, title and interest in and to the Patents.

NOW, THEREFORE, in consideration of the mutual agreements contained herein and in the Bill of Sale, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Assignor does hereby confirm its previous assignment as having sold, assigned and transferred, and to the extent not previously accomplished, does hereby sell, assign and transfer unto Assignee, its successors or assigns, the entire right, title and interest in and to the Patents.
