## PATENT ASSIGNMENT

This PATENT ASSIGNMENT (this "Assignment") is made effective as of

October 18, 2022 (the "Effective Date") between KENNETH W. GORDON, AS CHAPTER 7 TRUSTEE FOR THE ESTATE OF CURAEGIS TECHNOLOGIES, INC. (CASE NO. 15-21240) AND NOT INDIVIDUALLY ("Trustee" or Assignor"), and CURAGROUP, INC., a New York corporation ("Purchaser or Assignee").

By its Order dated August 18, 2022 (the "Order"), the United States Bankruptcy Court for the Western District of New York authorized the Trustee to sell all of the assets of CurAegis Technologies, Inc. (the "Debtor") to Purchaser, inclusive of the Patents as described herein, and further authorized the Trustee to execute any necessary documents to effect the assignment thereof. In accordance therewith the parties agree as follows:

1. Assignor hereby irrevocably sells, assigns, transfers, and conveys to Assignee all of the Debtor's right, title, and interest in and to any and all of the following (collectively, the "Patent Rights"):

(a) the patents, patent applications, and provisionals identified in the attached Schedule I hereto, together with any patent issuing on any such patent application or any patent application that derives priority from any such provisional, including any rights of priority in or to any of the foregoing patents, patent applications, or provisionals;

(b) each patent and patent application that derives priority from any of the patents, patent applications, or provisionals described in clause "(a)" above, including all extensions, renewals, reissues, reexaminations, divisionals, substitutions, provisionals, continuations, continuations-in-part, conversions, prolongations, continued examinations, continued prosecution applications, and domestic and foreign counterparts that derive priority from any of the patents, patent applications, or provisionals described in clause "(a)" above, and each patent issuing on any of the foregoing;

(c) each patent or patent application that is referenced by a terminal disclaimer filed in connection with any of the patents or patent applications identified in clause "(a)" or clause "(b)" above (each patent, patent application, and provisional described in clauses "(a)" through and including "(c)", collectively, the "Assigned Patents");

(d) all subject matter, and each invention, claimed or disclosed in each of the Assigned Patents and all embodiments of such subject matter and inventions (collectively, the "Inventions");

(e) all rights to apply in any and all jurisdictions anywhere in the world for patents, certificates of inventions, utility models, or other governmental grants with respect to each Assigned Patent and Invention, including the right to apply for patents pursuant to any convention, treaty, agreement or understanding;

(f) to the extent they exist (but without any representation by the Trustee), any and all causes of action (whether known or unknown or whether currently pending, filed, or otherwise) and other enforcement rights under, or on account of, any of the Assigned Patents, Inventions, and items in any of the foregoing clauses "(a)" through and including "(e)" above, including all causes of action and other enforcement rights for (i) damages, (ii) injunctive relief, (iii) any other remedies of any kind (in each of the cases in clauses "(i)", "(ii)", and "(iii)" of this clause "(f)" for past, current, and future infringement), and (iv) all rights to collect royalties and other payments under or on account of each of the Assigned Patents, Inventions, and items in any of the foregoing clauses "(a)" through and including "(e)" above.

2. Assignor hereby authorizes the respective patent office or governmental agency in each jurisdiction to issue any and all patents, certificates of invention, utility models or other governmental grants or issuances that may be granted upon any of the Patent Rights in the name of Assignee, as the assignee to the entire interest therein.

3. Assignor hereby authorizes and requests the attorney or agent of record to insert on this Assignment any further identification that may be necessary or desirable in order to comply with the rules of the respective patent office or governmental agency in each jurisdiction for recordation or other official recognition.

4. This Assignment, the rights and obligations of the parties under this Assignment, and any claim or controversy directly or indirectly based upon, arising out of or related to, this Assignment or the transactions contemplated by this Assignment (whether based upon contract, tort or any other theory), including all matters of construction, validity and performance, shall be governed by and construed in accordance with the laws of the State of New York, without regard to any conflict of laws provisions that would require the application of the law of any other jurisdiction.
