**EXECUTION VERSION****PATENT ASSIGNMENT AGREEMENT**

This PATENT ASSIGNMENT AGREEMENT (this “Assignment”) is effective as of March 31, 2023, by and between CommScope Technologies LLC, a Delaware corporation (“Assignor”) and Digicomm International LLC, a Delaware limited liability company (“Assignee”). Assignor and Assignee are sometimes individually referred to herein as a “Party” and collectively as the “Parties.”

**RECITALS**

A. Assignor is an Affiliate of CommScope, Inc. of North Carolina, a North Carolina corporation (“Seller”), and Seller and Assignee are parties to an Asset Purchase Agreement, dated as of or about the date hereof (as amended, supplemented, restated or otherwise modified from time to time, the “Purchase Agreement”), pursuant to which and subject to its terms, among other things, Assignor has agreed to sell, convey, assign, transfer and deliver to Assignee, and Assignee has agreed to purchase, accept, and take from Assignor, the Patents (as defined below). The execution and delivery of this Assignment is a condition to the closing of the transactions contemplated by the Purchase Agreement.

B. Capitalized terms used but not defined herein shall have the meaning assigned to such terms in the Purchase Agreement.

**AGREEMENT**

**NOW, THEREFORE**, for good and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, Assignor hereby agrees as follows:

1. Assignor does hereby assign to Assignee all of Assignor’s right, title, and interest in and to: (a) the patents and patent applications set forth on Schedule 1, together with all issuances, divisionals, continuations, continuations-in-part, reissues, extensions, reexaminations, and renewals thereof including any and all international, foreign, regional and convention applications corresponding thereto (the “Patents”); (b) all rights of any kind whatsoever of Assignor accruing under any of the foregoing provided by applicable law of any jurisdiction, by international treaties and conventions, and otherwise throughout the world; (c) any and all royalties, fees, income, payments, and other proceeds now or hereafter due or payable with respect to any and all of the foregoing; and (d) any and all claims and causes of action with respect to any of the foregoing, whether accruing before, on, or after the date hereof, including all rights to and claims for damages, restitution, and injunctive and other legal and equitable relief for past, present, and future infringement, dilution, misappropriation, violation, misuse, breach, or default, with the right but no obligation to sue for such legal and equitable relief and to collect, or otherwise recover, any such damages.

2. Assignor acknowledges that, subsequent to the date hereof, Assignor shall not claim to possess any right, title, or interest in or to such Patents and shall take no actions that would jeopardize the existence, validity or enforceability of the Patents or Assignee’s rights therein.

3. Assignor agrees, at Assignee’s request and expense, to execute such additional assignments and other writings as Assignee deems necessary in making application for and obtaining continuations, continuations-in-part, continuing prosecutions, divisionals, renewals, reissues, reexamined, or of any and all foreign countries, of the Patents. If any additional documents and instruments are reasonably necessary to perfect Assignee’s right, title, and interest in this Assignment and recordation thereof, on Assignee’s written request and at the Assignee’s expense, Assignor shall execute such documents and instruments prepared by Assignee without undue delay.

4. Assignor represents and warrants that Assignor has the right, title, and authority to execute this Assignment and to convey any and all right, title, and interest in the Patents subject to the terms of the Purchase Agreement, and that Assignor will not convey hereafter all or part of the Patents to a third party.

5. Notwithstanding any other provision of this Assignment to the contrary, nothing contained in this Assignment shall in any way supersede, modify, replace, amend, change, rescind, waive, exceed, expand, enlarge or in any way affect the provisions, including the warranties, covenants, agreements, conditions, representations or, in general, any of the rights and remedies, or any of the obligations of Assignor set forth in the Purchase Agreement, nor shall this Assignment expand or enlarge any remedies under the Purchase Agreement. This Assignment is intended only to effect the transfer of certain property to be transferred pursuant to the Purchase Agreement and shall be governed entirely in accordance with the terms and conditions of the Purchase Agreement. Without limiting the foregoing, Assignee acknowledges that Assignor makes no representations or warranties with respect to the Patents except as specifically set forth in the Purchase Agreement. In the event of any conflict between this Assignment and the Purchase Agreement, the Purchase Agreement shall control.

6. This Assignment shall be governed by and construed in accordance with the internal Laws of the State of Delaware without giving effect to any choice or conflict of Law provision or rule (whether of the State of Delaware or any other jurisdiction) that would cause the application of Laws of any jurisdiction other than those of the State of Delaware.

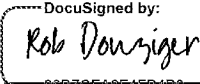

7. This Assignment may be executed in any number of counterparts, each of which shall be deemed an original, but all of which together shall constitute one and the same instrument. This Assignment shall become effective when duly executed and delivered by each Party. Counterparty signature pages to this Assignment may be delivered by facsimile or electronic delivery (e.g., by DocuSign or email of a PDF signature page) and each such counterpart signature page shall constitute an original for all purposes.
